One family

The world is changing, and we are changing with it. As a family company, we have grown steadily over the last sixty years to become a reliable partner to expert technicians and electrical wholesalers around the world. All while remaining true to ourselves and to our values. And so we continue today, with a number of well-known brands – each with their own distinctive strengths – working together under the Hager Group umbrella.

Hager Forum in Obernai, France, is a place where we can work with customers and partners to shape the future. That makes it a perfect symbol of the innovative power of Hager Group.

hagergroup

Your trust

As a partner and customer, you can choose from the entire range of products and services offered by every member of our brand family. Our new corporate image highlights our shared strengths even more clearly. From now on, each of our brands will be easily recognisable as a 'Member of Hager Group'. The new corporate image also involves some colour and design changes. Our core promise remains the same: we will always work with you to succeed together.

Our strengths

We have huge opportunities ahead. The upcoming modernisation of existing buildings, intelligent building technology, digital services, new energy sources and technologies – all of this opens up new, exciting potential for you and for us. At the same time, business requirements are becoming more and more complex. That's why it's so important for you to have Hager Group specialists supporting you with all of their expertise. Together, we are stronger. Together, we will overcome the complex challenges of our time with simple, impressive solutions – just as we have been doing for the last six decades.

E3

Global warming, a shortage of natural resources, social cohesion and the transition to renewable energy: there are many challenges facing businesses and society today. Hager Group is pursuing a variety of initiatives to promote sustainable development with its “E3” approach.

Environ

E for Environment

We work continuously to reduce our carbon footprint. Our priorities include optimising the transport of our products and cutting the amount of energy we use in production to further reduce our Carbon footprint.

Ethics

E for Ethics

We need skilled, motivated and healthy employees in order to offer our customers the best services and products. That's why we provide all our team members with a safe, healthy working environment, support their professional growth and offer them opportunities for further development. We also promote diversity and adherence to an Ethics Code throughout the company.

ment

Energy

E for Energy

Hager Group helps its customers to save energy intelligently. We also analyse and optimise our products' environmental performance throughout development and production. By providing a detailed environmental profile for most of our products, we can be fully transparent with our customers and ourselves.

Technology as a friend

Hager Design turns technical products into familiar friends.

Before we start designing a new product, we think about the people it is going to serve. Will it assist or entertain, observe or protect, save time or save energy? Ideally, whatever it does, users will feel it is a reliable 'friend'. We need to know how to connect with people on an emotional level, to ensure that in return they feel connected to our products.

Technology for people

Responsible design builds on an ethical foundation. At Hager, this foundation is all about respecting people and caring about their well-being. And it's not just about today – we want to inspire our customers for years to come. That's why we include them in every stage of the design process – from installer to planner, to end user.

An honest brand

Hager products are world-renowned for their quality, which is visibly and tangibly unveiled in their design. The unmistakable, explicit and clear brand image tells customers straight away that these products are part of 'the family'. This is our signature, the Hager DNA, which embodies two central principles.

Friendly, serene, balanced

An honest, authentic design that blends naturally into everyday life, without gadgets or cheap effects.

Erwin van Handenhoven
Hager Group Design Director

Ingeniously simple

Our products are important, but never over-the-top. If it's not necessary, we leave it out. The essence remains. Straightforward in both form and function: simple to install, simple to use. Simply Hager!

Looking ahead to the future

Hager systems are not stagnant – they are expanding, gaining more and more visibility in our customer's homes. This has implications for our present design language. We call it 'New Start'. The aim of New Start is to meet our customers where they are, and carry them with us into the future: with innovative ideas, new designs and expressive materials. The new Hager catalogue is full of 'New Starters' – along with lots of 'old friends'. Come and explore!

KNX

the strength of a standard.

Guaranteed compatibility

For over 20 years, the presence of the KNX logo on products has certified that they communicate perfectly with each other, even when they are offered by different manufacturers. This ensures a high degree of flexibility in the extension and modification of facilities.

Seamless continuity

The extent of the KNX community gives the protocol a unique power in the building automation market. Its broad range of products constitutes a set of solutions to meet all situations.

Openness, a state of mind

Various gateways are offered by the adherents of KNX to create links with other specification standards such as DALI and BACNET.

System programming premium KNX solution

For large-scale and commercial projects requesting a whole range of functionalities, system is the most adapted solution. Our KNX system range has been developed for the most complex and demanding installations. Our wide range of KNX devices offers very advanced configuration possibilities in ETS software. The range of KNX modules consists in output devices for shutters and lighting management as well as binary modules with current measurement.

Configuration

ETS is the software used for the configuration of every KNX solution. To configure the products, the computer has to be plugged to the installation via a gateway.

The software includes many features, such as:

- easy and quick integration of wireless KNX products in the installation
- user-friendly interface
- simple database
- possibility to track changes related to the project...

Benefits

- Efficient installation: ETS 5 configuration software has become so simple and intuitive to use for a quick configuration
- A wide range of products to answer all type of projects
- Comfort as its best: possibility to set unlimited number of various scenarios
- Safer installations: would any problem occur, it is possible to troubleshoot easily and quickly

KNX wall-mounted input devices

There are devices which want to show everyone, all the time, what they can do. And there are those all-rounders, who hide their technical perfection and spacious insert width behind a discreet surface. These include our KNX control sections, which can be integrated easily into our switch range using simply their design or using a frame.

Push-buttons

Bus application unit flush-mounted

- external temperature sensor

Operating voltage over bus 21 ... 32 V=
 Operating temperature - 5 ... + 45 °C
 Insertion depth 32 mm

- with programming button and red programming LED
- additional connection for external temperature sensor
- with integrated buzzer for acoustic identification of the device within the system
- bus connection via connecting terminal
- with spreader claws

Suitable for	Order no.	Page
Outdoor temperature sensor	EK088	39
Temperature sensor	EK090	40

Design	Order no.	PU
Bus application unit flush-mounted	8004 00 01	1
Bus application unit flush-mounted	8004 00 11	10

Push-button 1gang

- labelling field
- RGB LED
- internal temperature sensor

Power consumption, KNX ≈ 150 mW
 Operating temperature - 5 ... + 45 °C
 Current consumption 20 mA

- with white operating LED
- status LED configurable in 6 colors
- brightness value of the status LED for day/nighttime operation preset, status LED for day/nighttime operation can be controlled via object
- operation LED can be configured via object
- operating concepts for button function and "roller shutter/blind function" predefined
- button functions: switching, dimming, roller shutter/blind, timer, value transmitter 2 byte, thermostat extension unit, priority, scene, automatic control deactivation
- value transmitter for temperature values 2 byte
- switching of up to 64 scenes possible
- parameter defineable lock function
- function for incremental selection of up to 7 stored values
- function for manual interruption of automatic functions already triggered
- integrated temperature sensor with output of the measured values via object
- for bus coupling unit flush-mounted
- alarm telegram after disconnection from bus coupling unit 1 bit or 1 byte
- with anti-dismantling protection

Use only in conjunction with bus coupling unit flush-mounted (order no.: 8004 00 x1)

Push-buttons with thermostat

Bus coupling unit flush-mounted

Operating voltage over bus	21 ... 32 V=	- with programming button and red programming LED
Power consumption, KNX	≈ 100 mW	- as interface between KNX user module and bus line
Operating temperature	-5 ... +45 °C	- bus connection via connecting terminal
Insertion depth	23 mm	- without spreader claws

Design	Order no.	PU
Bus coupling unit flush-mounted	7504 00 01	1

Berker S.1/B.3/B.7, K.1/K.5 - push-buttons with thermostat

- For switch, push-button, dimmer, blind and thermostat functions
- Single and two push-button operation configurable
- One push-button operation for switching, push-buttons, blinds and dimming
- Extension unit for light scene push-button
- For individual single room temperature control
- For heating and/or cooling mode with/without auxiliary step
- Controller operating modes: comfort, standby, night and frost/heat protection mode
- LC display with symbol display
- With 2 additional function buttons for display control
- Display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- Temperature measurement via internal and/or external temperature sensor with mean value formation
- With room temperature timer
- For installation in single standard wall boxes
- For continuous (PI) or switched (2-point) control of max. 2 control circuits
- With dismantling protection
- With button blocking function
- End customer display scope
- Separate object for window contact
- Programmable from ETS2, V1.2a
- Alarm telegram after disconnection from bus coupling unit 1 bit or 1 byte
- Presence button configurable to extend comfort
- Value transmitter for dimming, position, brightness and temperature values 1 and 2 byte

Push-button with bus coupling unit

Push-button modules

Push-button module 1gang

- RGB LED
- internal temperature sensor
- integrated bus coupling unit

Operating voltage over bus
Current consumption
Operating temperature
Insertion depth

21 ... 32 V=
10 mA
- 5 ... + 45 °C
32 mm

- status LED configurable in 6 colors
- brightness value of the status LED for day/nighttime operation preset, status LED for day/nighttime operation can be controlled via object
- operation LED can be configured via object
- operating concepts for button function and "roller shutter/blind function" predefined
- push-button functions: switching, dimming, roller shutter/blind, value transmitter 2 byte, thermostat, scene, priority
- value transmitter for temperature values 2 byte
- parameter defineable lock function
- function for manual interruption of automatic functions already triggered
- with programming button and red programming LED
- integrated temperature sensor with output of the measured values via object
- with integrated bus coupling unit
- bus connection via connecting terminal
- with anti-dismantling protection
- with integrated buzzer for acoustic identification of the device within the system

Suitable for	Order no.	Page

Motion detectors

KNX motion detector

KNX motion detector module 1.1 m

- internal temperature sensor
- integrated bus coupling unit

Operating voltage over bus	21 ... 32 V=
Current consumption KNX	max. 10 mA
Nominal mounting height	1.1 m
Delay time, adjustable	10 s ... 30 min
Response brightness, adjustable	≈ 5...1000 lx, ∞ lx (day)
Detection angle, settable	each side ≈ 45 ... 90 °
Detection field, rectangular shaped	≈ 12 x 16 m
Operating temperature	- 5 ... + 45 °C

Automatic triggering of bus functions for movement within the detection area or manual control via integrated button.

Continuous direct sunlight penetrating the upward-pointing detection plane can result in failure of the motion detector.

Only suitable for indoor areas!

- with 3 operating modes: automatic/permanent ON/permanent OFF
- Master/Slave operation for covering large detection areas
- with test mode
- with button for automatic/permanent ON/permanent OFF
- operating mode display via status LED, red/green/orange
- two function channels for brightness-dependent functions
- additional channel for independent of brightness detector mode
- output of the brightness value via object possible
- with integrated bus coupling unit
- bus connection via connecting terminal
- with dismantling protection

Suitable for	Order no.	Page

KNX thermostat and room controller

KNX thermostat

- display
- integrated bus coupling unit

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V=
Energy efficiency class	IV (2%)
TFT screen size	1.93"
Operating temperature	- 5 ... + 45 °C
Dimensions of display (W x H)	38.3 x 30.3 mm
Insertion depth	32 mm

- for individual single room temperature control
- control parameter for heating/cooling unit pre-set
- operating mode heating, cooling or heating/cooling can be selected
- comfort, standby, night-time reduction, frost/heat protection operating mode switchable via scene
- switching PI-control (PWM) or switching 2-point control can be selected
- heating type warm water heating, warm water underfloor heating, electric heating, electric underfloor heating or split unit can be selected
- cooling type cooling ceiling, convector fan or split unit can be selected
- switching of up to 64 scenes possible
- with keylock
- with holiday switching
- with frost protection function
- additional connection for external temperature sensor
- temperature measurement via internal, external temperature sensor or via object and their mean value formation
- temperature adjustable for comfort, standby and night-time reduction
- operation via sensitive Touch control surface
- to display and initiate actions
- display of operating mode, controller lockout, room/ outside temperature, time
- screensavers
- TFT colour display with symbol display
- time and date display
- menu guidance in DE/EN/FR/NL/IT/ES/PT/PL/DK/SV/FI/NO/TR
- with integrated bus coupling unit
- bus connection via connecting terminal
- with spreader claws

KNX Touch Control

KNX Touch Control

- display
- integrated bus coupling unit

Operating voltage via bus	21/32 V DC
Auxiliary voltage	12/40 V DC
TFT screen size	3.5"
Display resolution	320 x 240 px
Power consumption, KNX	~ 1 mW
Operating temperature	0/50 °C
Assembly height	25,5 mm
Dimensions (W x H x D)	95/75/44 mm

- up to 10 pages for operating elements and display selection from 37 predefined layouts
- capacitive 3.5" touch display, resolution of 320 x 240 pixels
- integrated proximity sensor for quick activation of the display from standby mode and for triggering functions via a corresponding communication object
- integrated brightness sensor for automatic adjustment of the display lighting
- integrated scene control (16 scenes), timer, alarm clock
- 5 automatic channels for regulation and control (e.g. room temperature control via the KNX temperature sensor of the new push-button sensors)
- 4 AND as well as 4 OR logic gates with 4 inputs each (communication objects)
- 4 inputs for binary contact or temperature sensor
- microSD card slot e.g. as memory for image data for screen saver
- icons for display can be replaced (icon library, microSD card)

KNX EnOcean

EnOcean wireless wall-transmitter module

Number of wireless channels	2
Wireless transmission frequency	868.3 MHz
Wireless transmission range (free field)	max. 300 m
Wireless transmission range (building)	max. 30 m
Operating temperature	-25 to +65°C
Relative humidity	0 ... 95%

- single-surface operation in conjunction with suitable wireless receivers
- for the transmission of switching, dimming or blind commands to the wireless receiver of the EnOcean system
- each channel can be assigned to any number of wireless receivers
- provision of transmission energy through conversion of the mechanical energy on button actuation
- batteryless, maintenance-free device without external power supply
- with fitting material
- mounting with frames on even surface, e.g. also for extension of combinations
- for screw or adhesive fixing

KNX EnOcean Gateway surface-mounted

Operating voltage over bus	21 ... 32V=
Current consumption	ca. 12mA
Wireless transmission/reception frequency	868.3MHz (ASK)
Number of function channels	32
Operating temperature	-5 ... +45°C
Relative humidity	5 ... 93%
Dimensions	81 x 81 x 25mm

Bi-directional gateway for transmission of EnOcean wireless signals to the KNX bus or of KNX telegrams into the EnOcean system.

- each channel can be configured with different functions
- EnOcean receiver functions for conversion into KNX telegrams: including switching, dimming, blind, light scene, window contacts, temperature values, brightness values, presence simulation, room control devices
- EnOcean transmission functions for the conversion of KNX telegrams: switching, dimming, blind, valve drives
- logic and control functions
- teaching-in of the wireless components using the buttons and display
- LC display for commissioning and system diagnostics
- with programming button and red programming LED
- with integrated repeater for EnOcean transmission commands
- bus connection via connecting terminal
- installation possible on flush-mounted box

Suitable for	Order no.	Page
EnOcean wireless wall-transmitter module	2411 12 00	36

Design	Order no.	PU
white	TYC120	10

Sensors

Thermostat

- For individual single room temperature control
- For heating and/or cooling mode
- Heating or cooling possible in 2 stages
- Bus connection via connecting terminal
- For continuous (PI) or switched (2-point) control
- With dismantling protection
- 4 binary inputs or 2-3 binary inputs and 1-2 outputs parameterisable
- With 4 independent binary inputs for potential-free contacts e.g. window magnetic contact
- Behaviour can be defined for bus voltage return
- Binary inputs / outputs with screw terminals
- Valve protection can be defined

KNX thermostat

- setting knob
- integrated bus coupling unit

Output current per channel	max. 0.8 mA
Set value control by setting knob	± 0 ... 5 K
Operating temperature	-5 ... +45 °C
Cable length, inputs/outputs	max. 5 m
Sensor cable length	50 m

Binary input 4 parameter defineable for temperature sensor, order no. 161.

- operating modes: comfort, standby, night lowering, frost/heat protection, dewpoint displayed with LED
- with presence button for switching between comfort and standby mode
- with programming button and red programming LED
- presence button and setting knob can be programmed to have no functions
- with status LEDs: red for heating, blue for cooling and yellow for activation
- without spreader claws

Operating temperature	0 °C ... +45 °C
Protection type	IP21

- operating modes: comfort, standby, night lowering, frost/heat protected, dewpoint
- with programming button and programming LED
- red/blue LED (red for heating and blue for cooling)
- one input allows a floor temperature probe to be connected.

Binary input 3 parameter defineable for temperature sensor, order EK087.

Suitable for optional

KNX object thermostat

- integrated bus coupling unit

Output current per channel max. 0.8 mA
 Operating temperature -5 ... +45 °C
 Cable length, inputs/outputs max. 5 m
 Sensor cable length 50 m

- operating modes: comfort, standby, night lowering, frost/heat protected, dewpoint
- with programming button and red programming LED
- without spreader claws

Suitable for optional	Order no.	Page
Temperature sensor	161	39

Binary input 4 parameter defineable for temperature sensor, order no. 161.

CO2 Sensors

CO2 Sensors

- integrated bus coupling unit

Rated voltage KNX DC 21 ... 32 V SELV
 Current consumption KNX typical 12.5 mA
 Operating temperature -5 ... +45 °C
 CO2 sensor measuring range 0 ... 2000 ppm
 Humidity sensors measuring range 10 ... 95 %
 Temperature sensors measuring range -5 ... +45 °C

- measurement of CO2 concentration, relative air humidity and air temperature
- operating modes Comfort, Standby, Night operation, Frost/heat protection
- dew point alarm for, for example, cooling blankets and conservatories, to avoid possible mould formation
- max of 4 different adjustable CO2 threshold values
- measurement of room temperature and comparison with setpoint temperature
- max of 2 adjustable humidity threshold values
- programming button and LEDs
- functions: dimming, shutter control, light scene extension unit, brightness or temperature value transmitter.
- inputs lockable in operation

Output of the measured values as telegram to the bus, e.g. for controlling fans or window drives via KNX telegrams.

Recommendation: Use deep accessory sockets.
 The optimum installation height is approx. 1.5 m.

Frames made from special materials

Anthracite/polar white glossy, natural slate frames

Not suitable for water-protected, flush-mounted installation IP44.

Caution!
Installation only possible on a flat surface.
Tighten screws of the covers only by hand.

The colour of surface material can change when exposed to UV radiation.

Caution!
Natural product made from open-pored material, which is sensitive to grease and dirt.

- for vertical and horizontal mounting
- natural, untreated surface structure
- natural material that underscores the individual character by means of developed structures and different material thicknesses and colour schemes

Caution!
Installation only possible on a flat surface.
Tighten screws of the covers only by hand.

The colour of surface material can change when exposed to UV radiation.

Caution!
Natural product made from open-pored material, which is sensitive to grease and dirt.

- for vertical and horizontal mounting
- smoothly milled surface
- natural material that underscores the individual character by means of different structures and colour schemes

Design	Order No.	PU
1gang	1011 23 79	1
2gang	1012 23 79	1
3gang	1013 23 79	1

Grey/black glossy, grounded concrete frames

Not suitable for water-protected, flush-mounted installation IP44.

Caution!
Installation only possible on a flat surface.
Tighten screws of the covers only by hand.

The colour of surface material can change when exposed to UV radiation.

Caution!
Natural product made from open-pored material, which is sensitive to grease and dirt.

- for vertical and horizontal mounting
- smoothly milled surface
- natural material that underscores the individual character by means of different structures and colour schemes

Design	Order No.	PU
1gang	1011 23 74	1
2gang	1012 23 74	1
3gang	1013 23 74	1

Brown/polar white glossy, embossed leather frames

Not suitable for water-protected, flush-mounted installation IP44.

Patina typical for real leather can develop over time due to touch and the influence of light.

Caution!
Natural product made from open-pored material, which is sensitive to grease and dirt.

- for vertical and horizontal mounting
- structured surface
- high quality, durable material that underscores the individual character by means of different structures and colour schemes

Design	Order No.	PU
1gang	1011 23 69	1
2gang	1012 23 69	1
3gang	1013 23 69	1
4gang	1014 23 69	1
5gang	1015 23 69	1

Brown/black glossy, embossed leather frames

Not suitable for water-protected, flush-mounted installation IP44.

The shape of surface materials can change during changes in temperature and humidity and its colour can change when exposed to UV radiation.

Patina typical for real leather can develop over time due to touch and the influence of light.

Caution!
Natural product made from open-pored material, which is sensitive to grease and dirt.

- for vertical and horizontal mounting
- structured surface
- high quality, durable material that underscores the individual character by means of different structures and colour schemes

Berker B.IQ

A wide array of alternative materials and colours have been added to the convenient variety of KNX functionality of the Berker B.IQ.

- Frameless KNX push-button with full-material rockers (glass, stainless steel and aluminium)
- High scope of functions in the KNX applications through devices integrating thermostats
- The attractive appearance is rounded off using white status LEDs and a blue operation LED
- Suitable variants for all materials and colours of sockets in the Berker B.7 switch range.

Push-buttons	78
Light scenes push-buttons	81
Push-buttons with thermostat	82
Labelling fields	84

- For suitable frames in the same "style" for additional applications, see the Design line B.7
- For additional products to complement the installation in matching colours/materials, refer to the Design platform S.1/B.x

Push-buttons

- For switch, push-button, dimmer and shutter functions
- Extension unit for light scene push-button
- For installation in single standard wall boxes
- With dismantling protection

Bus coupling unit flush-mounted

Operating voltage over bus	21 ... 32 V=	- with programming button and red programming LED
Power consumption, KNX	≈ 100 mW	- as interface between KNX user module and bus line
Operating temperature	-5 ... +45 °C	- bus connection via connecting terminal
Insertion depth	23 mm	- without spreader claws

Design	Order no.	PU
Bus coupling unit flush-mounted	7504 00 01	1

B.IQ push-button 1gang comfort

Operating temperature	-5 ... +45 °C	- single and two push-button operation parameterisable
Dimensions (W x H)	88.5 x 88.5 mm	- one push-button operation for switching, pushing, shutters and dimming
		- activation of second user level via object
		- with blue operation LED and 2 white status LEDs (labelling field lighting)
		- alarm telegram after disconnection from bus coupling unit 1 bit or 1 byte
		- cyclic transmission can also be started via switching object
		- value transmitter for dimming, position, brightness and temperature values 1 and 2 byte

Suitable for	Order no.	Page
Bus coupling unit flush-mounted	7504 00 01	78
optional		
B.IQ labelling field for push-buttons 1 to 3gang	7590 00 80	84

Design	Order no.	PU

Light scenes push-buttons

B.IQ push-button 4gang for light scenes

- | | | |
|---|-----------------|--|
| Number of load groups (increase on cascading) | 8 | – retrieval, adjustment and storage of 8 light scenes |
| Light scenes | max. 8 | – light scene push-buttons can be cascaded |
| Operating temperature | -5 ... +45 °C | – second operating level for setting load groups via 3-button actuation |
| Dimensions (W x H) | 88.5 x 118.1 mm | – with blue operation LED and 8 white status LEDs (labelling field lighting) |
| | | – dimming / position value transmitter 1 byte |
| | | – for installation in single standard wall boxes |
| | | – with anti-dismantling protection |

Suitable for	Order no.	Page

Push-buttons with thermostat

- For switch, push-button, dimmer, blind and thermostat functions
- Single and two push-button operation parameterisable
- One push-button operation for switching, buttons, blinds and dimming
- Extension unit for light scene push-button
- With 2 white status LEDs per rocker (labelling field illumination)
- With blue operation LED
- For individual single room temperature control
- For heating and/or cooling mode with/without auxiliary step
- Controller operating modes: comfort, standby, night and frost/heat protection mode
- With 2 additional function buttons for display control
- Display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- Temperature measurement via internal temperature sensor and/or external communication object (weighting ratio parameterisable)
- Provision of the internal temperature value via communication object
- With room temperature timer and 2-week timer functions
- Button help function can be activated
- For installation in single standard wall boxes
- For continuous (PI) or switched (2-point) control of max. 2 control circuits
- With dismantling protection
- Text display (ASCII-format)
- LC display with symbols and illumination switchable via object
- With button blocking function
- End customer display scope parameterisable
- Separate object for window contact
- Programmable from ETS2, V1.2a
- Alarm telegram after disconnection from bus coupling unit 1 bit, 1 or 2 byte
- Presence button parameterisable to extend comfort
- Value transmitter for dimming, position, brightness and temperature values 1 and 2 byte

Flush-mounted bus coupling unit for B.IQ with thermostat

Operating voltage over bus	21 ... 32 V=	- for B.IQ push-buttons with thermostat and display or Bluetooth gateways
Operating temperature	-5 ... +45 °C	- with programming button and red programming LED
Insertion depth	20 mm	- bus connection via connecting terminal
		- without spreader claws

Berker TS Sensor

Understatement is an art, and the Berker TS Sensor makes it perfect. Up to eight functions are concealed under a pure surface that is practically flush with the wall, and can be custom-labelled on request. A single touch is all it takes to control lights, heating or blinds. In this way, the Berker TS Sensor can offer an exciting variety of possibilities – and, at the same time, still seems as calm as possible.

Glass sensors	89
Supplementary products	92

Mounting

Glass sensors are snapped in place on a "wall box, 2gang, for glass sensor" using adjustable retaining pins in such a way that the glass sensors are seated almost on the wall. The supplied adapter ring provides anti-dismantling protection and gives the glass plate shadow contours. The adjustable retaining pins can be used to compensate for deviating installation depths or irregularities of the wall of up to 20 mm.

Connection

The glass sensor is connected to the interfaces of the respective systems via an adapter using a ribbon cable (see information for ordering and use). The separate power supply must be connected to the respective adapter.

Connection

The glass sensor with room thermostat is connected directly to the KNX and separate power supply using the connecting terminals located on the backside.

Removal

To pull glass sensors out of the clamp springs of the wall box, use the supplied dismantling aid with suction cups.

Glass sensors

Glass sensors comfort

- With integrated bus coupling unit
- Operation by gently touching the sensor surfaces on the white LEDs
- For switch, push-button, dimmer and shutter functions
- Single and two push-button operation parameterisable
- Retrieval, setting and storing of 8 light scenes
- One push-button operation for switching, buttons, blinds and dimming
- Extension unit for light scene push-button
- Integrated temperature sensor
- Temperature measurement via internal and/or external temperature sensor with mean value formation
- Additional connection for external temperature sensor
- Usable as thermostat extension unit
- Provision of the internal temperature value via communication object
- Blocking function for sensor surface e.g. for cleaning the glass surface
- Value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- Bus connection via connecting terminal
- For vertical mounting
- For mounting, always use the flat 2gang wall box, order no. 1871
- With adapter ring for dismantling protection, shadow jointing and special installation conditions
- With disassembly suction tool
- For individually labelled glass and touch sensors (configured variations), the Web Configurator generates a layout number, which must be additionally specified when placing the order.
- Many options for labelling (text and/or icons) are available via the **web configurator** at <http://ts-glas-sensor.berker.de>

Glass sensor 1gang comfort

- integrated bus coupling unit

Operating voltage 21 ... 32 V=
 Current consumption 12.5 mA
 Operating temperature -5 ... +45 °C
 Dimensions (W x H x D) 86 x 160 x 5.7 mm

Only suitable for KNX.

- with blue operation LED and 2 white status LEDs
- for additional products to complement the installation in matching colours/materials, refer to the Design platform S.1/B.x
- for glass frames in the same "style" for additional applications, see the Design line B.7

Berker TS/TS Crystal

Behind its elegantly purist exterior, there is an unexpected wealth of technical options: the Berker TS allows operation, not only of multiple light sources, but, if so desired, also of intelligent building control systems. With their fine platform and switching knobs **MADE WITH SWAROVSKI ELEMENTS**, the Berker TS Crystal lends refinement to any atmosphere.

Berker R.1/R.3 Touch Sensors

Just right for the switch programmes in the R.-Design is the Berker Touch Sensor – in a soft (R.1) and cornered (R.3) contour as well as in the glass surfaces black and polar white.

The KNX-Touch Sensor has the same assembly height as the switches in the R.-Design.

With its integrated bus coupling unit, a variety of building functions can be read and controlled through it.

Touch Sensors comfort	102
Touch Sensors with thermostat	105

Touch sensors comfort

- With integrated bus coupling unit
- Operation by gently touching the sensor surfaces on the white LEDs
- For switch, push-button, dimmer and shutter functions
- Single and two push-button operation configurable
- Retrieval, setting and storing of 8 light scenes
- One push-button operation for switching, buttons, blinds and dimming
- Extension unit for light scene push-button
- Temperature measurement via internal and/or external temperature sensor with mean value formation
- Additional connection for external temperature sensor
- Usable as thermostat extension unit
- Provision of the internal temperature value via communication object
- Blocking function for sensor surface e.g. for cleaning the glass surface
- Value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- Bus connection via connecting terminal
- For mounting on a double box, e.g. order no. 1809 (flush mounting) or 1824 (hollow wall mounting)
- For vertical mounting
- With dismantling protection via a screw on the fastening ring
- For individually labelled glass and touch sensors (configured variations), the new Web Configurator generates a layout number, which must be additionally specified when placing the order.
- Many options for labelling (text and/or icons) are available via the **web configurator** at <http://ts-glas-sensor.berker.de>

Touch Sensor 1gang comfort

- integrated bus coupling unit

Operating voltage	21 ... 32 V=
Current consumption	12.5 mA
Operating temperature	-5 ... +45 °C
Dimensions (W x H x D)	81 x 152 x 10 mm

- with blue operation LED and 2 white status LEDs
- for additional products to complement the installation in matching colours/materials, refer to the Design platform R.1/R.3

Touch Sensors with thermostat

- With integrated bus coupling unit
- Operation by gently touching the sensor surfaces on the white LEDs
- For switch, push-button, dimmer, blind and thermostat functions
- Single and two push-button operation configurable
- One push-button operation for switching, buttons, blinds and dimming
- For individual single room temperature control
- For heating and/or cooling mode with/without auxiliary step
- Operating modes: comfort, standby, night operation and frost/heat protection adjustable
- LED display with symbol display
- With 2 additional sensor surfaces for display control
- Display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- Integrated temperature sensor
- Temperature measurement via internal and/or external temperature sensor with mean value formation
- Additional connection for external temperature sensor
- Provision of the internal temperature value via communication object
- Temperature control via local measurement or measured value via object
- Value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- Separate auxiliary power supply needed
- Operation with non-choked output of KNX voltage supply possible (pay attention to current consumption)
- Bus connection via connecting terminal
- For mounting on a double box, e.g. order no. 1809 (flush mounting) or 1824 (hollow wall mounting)
- For vertical mounting
- With dismantling protection via a screw on the fastening ring

KNX inputs, outputs and system components

With KNX, a building provides a significant contribution to looking after itself: motion detectors activate lighting as necessary. Windows and doors left open by accident are signalled using magnetic contacts and can be closed automatically. In addition, when the windows are open, the heating/cooling system reduces output. Using the KNX bus system, your house can learn to adapt to changed environmental conditions.

Presence detectors

KNX 2-channel presence detector

Supply voltage	Bus 30 V
Power consumption	12 mA
Lighting time delay via potentiometer	1 to 30 min
Presence time delay via potentiometer	30 s to 60 min
Brightness threshold	5 to 1200 lux
Recommended installation distance from ground	2.5 m to 3.5 m
Operating temperature	0°C to 45°C

- TX510 devices are 2-channel presence detectors capable of detecting low amplitude movements (e.g. person working in an office).
- 2 control channels via KNX bus.
- Time delay adjustment for brightness and presence controls via product potentiometers or via ETS.
- Brightness threshold adjustment via product potentiometer or via ETS.
- Detection is by means of 2 pyroelectric sensors located under detection lenses.
- Brightness sensor measures room brightness on a continuous basis, matching it against the brightness threshold set by potentiometer.
- The head of the detector is directional at 90° and can be used to adjust the detection area according to the room configuration.
- Application software allows configuring the 2 channel presence detector 360° TX510.
- The TX510 2-channel presence detector is sensitive to infrared rays associated with heat emitted by moving bodies. Lighting, roller shutter / blind, heating, priority and scene commands can be sent during movement detection, depending on the ambient brightness.
- The lighting channel controls a load in case of presence detection, when the ambient brightness is below an adjustable threshold.
- The presence channel controls a load in case of presence detection, without taking account of the ambient brightness.
- The ambient brightness threshold can be defined by parameterizing or on the device via a potentiometer.
- Lighting and presence delay function sends a command at the end of a delay when no presence has been detected during the delay ("absence" of persons). The delay value can be set by ETS or on the device via a potentiometer.
- Brightness probe locking (Lighting channel) function inhibits the brightness measurement of certain detectors when they control the same output.
- This function authorizes or forbids presence detection by the lighting channel (by a clock, for example, at certain periods). The presence channel continues operating independently.
- The operating mode (Automatic or Semi-automatic) is selected by ETS or via a switch directly on the device.
- Master/Slave function extends the motion detector's detection area by associating it with several other detectors.
- The Scene Execution function sends group commands to different kinds of outputs to create ambiances or scenarios (presence scenario, absence scenario ...)

KNX presence detector with light regulation

Supply voltage	29 V DC
Power consumption	12 mA
Lighting output operation time	1 to 30 min
Brightness threshold	5 to 1200 lux
Minimum adjustment range	0% to 50%
Presence level adjustment	mini to 100%
Recommended installation distance from ground	2.5 m to 3.5 m
Operating temperature	0°C to 45°C

- TX511 devices, in association with KNX dimmers, offer lighting control functions.
- 1 regulation channel via KNX bus.
- Brightness threshold, lighting time delay and minimum dimming level adjustment via product potentiometer or via ETS.
- They are designed to detect low amplitude movements (e.g. person working in an office).
- Detection is by means of 2 pyroelectric sensors located under detection lenses.
- A brightness sensor measures room brightness on a continuous basis, matching it against the brightness threshold set by potentiometer.
- The head of the detector is directional at 90° and can be used to adjust the detection area according to the room configuration.
- Application software allows configuring the 1-channel 360° presence detector light regulator TX511.
- The TX511 1-channel presence detector with light regulation is sensitive to infrared rays associated with heat emitted by moving bodies. It thus detects the presence or absence of persons in a room.
- Lighting level regulation can be active or inactive.
- When regulation is active, the regulation set points can be defined in Lux either via the potentiometer on the device or by ETS.
- When regulation is inactive, the dimming levels can be defined in % either via the potentiometer on the device or by ETS.
- Set point modification via push button function modifies the regulation set point or the dimming level in the presence of persons via a communicating push button. The new value is then stored.
- Lighting delay function starts a delay at each presence detection; it extends the presence period accordingly.
- Priority function allows overriding a regulation set point (active regulation) or a dimming level (inactive regulation).
- Authorization ON or OFF function authorizes or inhibits presence detection (by a clock, for example, at certain periods).
- The operating mode (Automatic or Semi-automatic) is selected by ETS or via a switch directly on the device.
- The Scene function allows defining, for a given scene number, regulation setpoints or lighting levels to create ambiances or scenarios (presence scenario, absence scenario ...)

KNX presence detector 360° monobloc

Supply voltage	KNX bus 30 V DC
Busline consumption	12 mA
Lighting output operating time	1 min to 1 hr
Brightness level	5 to 1000 lux
Recommended installation distance from ground	2.5 m to 3.5 m
Detection range	Ø 7 m (installed product height: 2.5 m)
Hole size required	60 mm (flush mounted)
Operating temperature	0°C to 45°C

- Occupancy sensors TCC520E are presence detectors designed to detect low amplitude movements (e.g. person sitting at a desk).
- Detection is by means of a pyro-electric sensor located under detection lens.
- The occupancy sensor measures the brightness in the room on a continuous basis and compares it to the level preset on the potentiometer or ETS parameter.
- One direct lighting control channel (relay output of the product).
- One lighting control channel on the KNX bus.
- Control of presence/ absence mode.
- Time and brightness adjustment via ETS or remote control EE807.
- Area linking: the occupancy sensor in a room can switch the light on in the corridor beside or the opposite.
- In addition to the local load, the detector can also activate an actuator connected to the bus when presence is detected and brightness level is below a defined threshold.
- The brightness threshold can be defined by ETS or directly on the device via a potentiometer or by means of the installer remote control EE807.
- The lighting time delay defines the activation duration of the lighting channel in case of occupancy. This delay may be reduced when there is enough ambient light. It can be set locally via potentiometer, remote control ETS, EE807.
- The Lighting channel and local load can also be switched on via the remote control ETS or via a EE808 push button.
- Authorization ON or OFF (Lighting channel) function authorizes or forbids presence detection by the lighting channel (by a clock, for example, at certain periods).
- The operating mode (Automatic or Semi-automatic) is selected by parameterizing or via a switch directly on the device.
- This function extends the presence detector's detection area by associating several other detectors.
- The local load can be controlled by the presence detector or directly via communication objects;

KNX presence detector with regulation DALI/DSI

Supply voltage	KNX bus 30 V DC
Busline consumption	12 mA
Lighting output operating time	1 min to 1 hr
Brightness level	5 to 1000 lux
Recommended installation distance from ground	2.5 m to 3.5 m
Detection range	Ø 7 m (installed product height: 2.5 m)
Hole size required	60 mm (flush mounted)
Operating temperature	-10°C to 45°C

- Presence detector with regulation DALI/DSI
- Occupancy sensors TCC521E are presence detectors designed to detect low amplitude movements (e.g. person sitting at a desk).
- Detection is by means of a pyro-electric sensor located under detection lens.
- The occupancy sensor measures the brightness in the room on a continuous basis and compares it to the level preset on the potentiometer (or by means of the remote control EE807 or ETS parameter).
- One lighting control channel on the KNX bus.
- Control of presence/ absence mode.
- Time and brightness adjustment via ETS or remote control EE807.
- Area linking: the occupancy sensor in a room can switch the light on in the corridor beside or the opposite.
- Application software allows configuring the light regulator -channel of TCC521E.
- The TCC521E presence detector for light regulation embeds a DALI/DSI interface that will be used to control directly DALI/DSI ballasts.
- It can also control KNX dimmers and KNX/DALI gateways (TX216) to fulfill the light regulation functionality.
- The lighting regulation process is activated according the presence and absence.
- When regulation is active, the detector regulates the lighting level in the room according to a set-point value in Lux in the presence of persons and according to another set-point value in the absence of persons.
- When regulation is inactive, the detector sets the dimming level of the dimmer outputs to a configurable set % value in the presence of persons and to another configurable set value in the absence of persons.
- Time delay (Lighting and regulation functions) function starts a delay at each presence detection; it extends the presence period accordingly.
- Authorization ON or OFF (Lighting and regulation functions) function authorizes or inhibits presence detection (by a clock, for example, at certain periods).
- The operating mode (Automatic or Semiautomatic) is selected by parameterizing or via a switch directly on the device.
- The Scene function allows defining, for a given scene number, regulation set-points or lighting levels to create ambiances or scenarios (presence scenario, absence scenario).
- Remote control via infra red control EE808.
- Setup with the installer remote control EE807.
- Linking Master / Slave function extends the motion detector's detection area by associating several other detectors.
- In addition to the lighting regulation channel, the detector can also activate an actuator connected to the bus, when presence and brightness level is below a defined threshold.

This product is mainly intended for automatic control of inside/outside lighting circuits (ON/OFF and dimming controls) and blinds or rolling shutters according to ambient lighting level.

Associated with an external probe, this lightsensitive switch measures natural lighting and controls circuits according to a preset threshold range of 2 to 20000 lux.

Several light sensitive switches may be chained to increase the number of channels. In this case, only one probe is connected to one of the light sensitive switches.

Physical sensors

KNX weather station

Weather station with GPS surface-mounted

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V~/=
Rated current (heating incl.)	81 mA
Brightness measuring range	0 ... 150000 lx
Temperature measuring range, linear	- 30 ... + 80 °C
Measuring range, wind speed	0 ... 35 m/s
Precipitation (Yes/No)	1 bit
Operating temperature	- 30 ... + 50 °C
Dimensions (W x H x D)	96 x 77 x 118 mm
Weight	≈ 170 g

For detection of wind, precipitation, temperature and brightness as well to process the signals.
Ensure correct orientation and free-standing installation.

- with wind, precipitation, twilight, temperature and brightness sensor
- with automatic summer/winter time change-over
- with heater element for winter operation
- with red programming LED
- for control of shading systems for up to 4 facades
- easy commissioning by means of predefined parameters
- predefined parameters when activating heat protection function or heat recovery function
- periodical emission for outside temperature, frost alarm, brightness, day/night mode, wind alarms and rain alarm predefined
- three preset limit values for wind alarm
- bus connection via connecting terminal
- with plug-in terminals for power supply
- for wall and mast assembly
- with pipe clamp for mast fixing

KNX weather station

Supply voltage	12-40 V DC 12-28 V AC
Consumption	max. 81 mA 24 V DC 10 % residual ripple
IP	44
Operating temperature	-30 °C to 50°C
Dimensions	96 x 77 x 118 mm

The weather station GPS-KNX TG053A measures the outdoor temperature, the wind speed and light. It detects rain and daylight fall.

The weather station gets date/time and site location data from GPS signals. It calculates also the exact position of the sun (Azimuth and Altitude) based on site coordinates and date/time data. This information (brightness level and sun position) is used to control blinds with slats based on sun tracking for up to 6 building frontages.

TG053A compact case houses all sensors, electronic data processing gear, GPS antenna and KNX bus connection.

The values measured are sent to the KNX bus as physical values (2x8 bits or 1 bit). Each output has communication objects indicating the measured and calculated values. The state of outputs depends on one or more levels. Thresholds can be defined by settings or the communication objects.

The weather station TG053A includes an annual clock and a weekly clock. The clock channels can switch the outputs using the communication objects. The weekly clock controls up to four different time settings for each day of the week. The annual clock can be used to define up to three periods in the year with two daily ON/OFF commands for each of them. The switching times can be defined by settings or the communication objects.

The weather station also has 8 logical AND gates and 8 logical OR gates, each with four inputs. All control events, time programs, and the 8 logical inputs (such as communication objects) can be used as inputs of logical gates. The output of each gate can be configured in 1-bit or 2 x 8-bit format.

ETS software performs KNX configuration.

Suitable for	Order no.	Page
Support for TG053 weather station, big	TG353	117
Analogue input 4gang RMD	ST312	140
Power supply 1x30V, 320 mA + 1x24V, 640 mA RMD	TXA114	139

Suitable for	Order no.	Page
KNX weather station	TG053A	116
Weather station with GPS surface-mounted	TXE530	116

Design	Order no.	PU
big (75 x 60 x 360 mm)	TG353	1
small (45 x 53 x 60 mm)	TG354	

Power supply for TG053 weather station

Supply voltage	230 V 160 mA max 24 V DC TBTS 0.25 A max
IP	54
Operating temperature	-25 °C to 50°C
Dimensions	50 x 50 x 24 mm

Design	Order no.	PU
black	TP110	1

Analogue inputs

Analogue input 4gang RMD

Frequency	50/60 Hz	– with green/red status LED (operation/fault)
Operating voltage over bus	21 ... 32 V=	– with programming button and red programming LED
Auxiliary voltage	24 V~	– for active sensors
Voltage, inputs	0-1; 0-10 V	– for wind, precipitation, brightness, temperature, twilight as well as humidity and temperature sensor, surface-mounted
Input impedance, voltage	18 kΩ	
Sensor output voltage	24 V=	– extendable with an analogue input module 4gang
Sensor output current	max. 100 mA	– bus connection via connecting terminal
Current consumption	170 mA	– inputs configurable can be set individually
Inputs, current	0-20; 4-20 mA	– input 4-20 mA will be controlled for wire break
Input impedance, current	100 Ω	– cyclic transmission or transmission at absolute input modification settable
Limit values	per channel 2	– with screw terminals
Operating temperature	-5 ... +45 °C	– with system interface for analogue input module
Assembling height as from DIN rail	63 mm	
Dimensions (W x H x D)	72 x 90 x 70 mm	
Width of rail mounted device (RMD)	4 TE	

The analogue input is for the registration and treatment of independent analogue sensor signals. Depending on the input signal, limiting value messages can be transmitted via KNX.

Input signals to according to DIN IEC 381-1, -2

Wind gauge

Wind gauge

Supply voltage	230 V AC 50 Hz
contact loading capacity	230 V AC 4 A
IP	65
Operating temperature	-25 °C to 50°C
Dimensions of the enclosure	80 x 100 x 52 mm

- Adjustment of wind's speed limit : up to 55 km/h (range ex-works 25 km/h)
- Reaction time when exceeding this limit : 3 seconds (5 seconds max.)
- Close time at wind : 10 minutes (fixed)

In the system tebis, the wind gauge TG050 is used as a protection device for solar shading equipment against strong wind. The speed of the wind is measured by the wind gauge.

If the wind's speed exceeds the value adjusted on the potentiometer for longer than three seconds, the solar shading equipment is retracted and kept in security position for 10 minutes.

After this delay, if the wind speed has decreased, the solar shading equipment can again be controlled by switches.

Input modules

- Power supply by Bus.
- The modules are installed in a 60 mm dia. Flush mounting box in association with a push button or a switch.
- Application software is used to configure the individual inputs.
- The sensors associated to the inputs (push buttons, switches, automatic controls) are used to control lighting, shutters, blinds.
- The Toggle Switch function changes the status of the controlled output whenever it is operated.
- This function is used for switching lighting, blind or heating circuits ON or OFF. The command may come from switches, push buttons or automatic controls.
- This function is used to control lighting circuits using one or two buttons
- The ON / OFF function transmits the ON / OFF object (short key-press).
- The Dimming function transmits the Dimming object (long key-press).
- This function controls a shutter or a blind using one or two push buttons.
- The Up / Down function transmits the Up / Down object (long key-press).
- The Stop / Angle function transmits the Stop / Angle object (short key-press).
- The Alarm 1 and Alarm 2 functions allow alarms coming from automatic controls to be periodically emitted (anemometer, rain detector, light sensitive switch, etc.)
- The Heating mode function is used to select a heating or air conditioning set point (Comfort, Eco, Frost protection, Absence). The command may come from switches, push buttons or automatic controls.
- The Value function (2 byte) is used for sending: Percentage %, Temperature °C, Luminosity level Lux, Brightness value % and Value 0-65535.
- The Scene function is used to select and storing scenes.
- The Timer function is used to switch ON or OFF a lighting circuit, shutters, heating for an adjustable time.
- The Priority function allows an input to be forced to a defined status.
- The Two Channel mode function allows controlling, with the same push button, two independent circuits having different functions.
- The Jamming function is used to lock an input via an object on the bus.
- With programming button and red programming LED.

2-input universal module

Contact current	0.5 mA
Supply voltage	30V DC
Busline max consumption	7 mA
Dimensions	38 x 35 x 12 mm
Degree of protection	IP 30
Operating temperature	+0 ... +45°C
Storage temperature	-20 ... +70°C
Standards	EN 60 669-2-1 NF EN 50 428

- Universal input modules are used to interface contacts free of potential with KNX bus.
- In this way, push buttons, switches or conventional automatic controls can become communicating devices.
- 2 independent channels.

Design	Order no.	PU
light grey, 2gang	TXB302	1

4-input universal module

Contact current	0.5 mA
Supply voltage	30V DC
Busline max consumption	8 mA
Dimensions	38 x 35 x 12 mm
Degree of protection	IP 30
Operating temperature	+0 ... +45°C
Storage temperature	-20 ... +70°C
Standards	EN 60 669-2-1 NF EN 50 428

- Universal input modules are used to interface contacts free of potential with KNX bus.
- 4 independent channels.

Input / output modules

- Power supply by Bus.
- Control of 2 LEDs.
- The modules are associated with push buttons or switches and are installed in a flush-mounted wall box of diameter 60mm and adapted depth.
- Connection length to push button and LEDs shall not exceed 5m.
- Physical addressing is done using push button and LED.
- Application softwares are used to configure the individual inputs of the TXB322 products.
- The products allow controlling lighting, blinds, shutters, heating and scenes.
- The Priority function sends priority-start or priority-stop commands.
- The Scene function sends group controls to different kinds of outputs to create ambiances or scenarios (leaving home scenario, reading ambience, etc.).
- The Jamming function authorizes product locking. Jamming forbids sending commands.
- The 2-channel mode function allows controlling, with the same push button, 2 independent circuits having different functions.
- LED outputs (statusindication) control the lighting of standard LED signal lamps.

2-input / 2-output module LED (status indication)

LED outputs specifications	I = 850 μ A U = 1.8V DC	- The universal input modules interface potential free contacts with KNX.		
Supply voltage	30V DC	- Push buttons, switches and conventional automatism can thus be used to drive standard LED indicators.		
Busline max consumption	15 mA	- Outputs can control conventional signaling LEDs.		
Dimensions	38 x 35 x 12 mm	- 2 independent channels.		
Degree of protection	IP 30

 - The Stop / Angle function transmits the Stop / Angle object (short key-press)
- The Alarm 1 and Alarm 2 functions allow alarms coming from automatic controls to be periodically emitted (anemometer, rain detector, light sensitive switch, etc.)
- The Heating mode function is used to select a heating or air conditioning set point (Comfort, Eco, Frost protection, Absence).
- The command may come from switches, push buttons or automatic controls.
- The Value function (2 byte) is used for sending: Percentage %, Temperature °C, Luminosity level Lux, Brightness value % and Value 0-65535.
- The Scene function is used to select and storing scenes.
- The Timer function is used to switch ON or OFF a lighting circuit, shutters, heating for an adjustable time
- The Priority function allows an input to be forced to a defined status
- The Two Channel mode function allows controlling, with the same push button, two independent circuits having different functions.
- The Jamming function is used to lock an input via an object on the bus
- The power cut detection function is used for specific management of an input during a power cut, taking into account all the status changes which could occur during this period
- With programming button and red programming LED
- Bus connection via connecting terminal
- quickconnect terminal

4-channel input module

Signal voltage	230V AC 50 Hz	- Universal input modules allow interfacing 230V AC contacts supplied by KNX bus
Maximum connection distance per input	100 m	- In this way, push buttons, switches or conventional automatic controls can become communicating devices
Minimum contacts closing time	18 ms	- 4 independent channels can be connected on different phases
Low signal level	0 -> 100 V	- It is possible to connect 10 illuminated push buttons per channel
High signal level	> 195 V	
Supply voltage	30V DC	
Busline max consumption	4 mA	
Width	4 modules	
Operating temperature	0°C to +45°C	
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
light grey	TXA304	1

6-channel input module

Signal voltage	24 ... 230V AC (50Hz)/DC	- Universal input modules allow interfacing contacts free of potential or supplied with 24...230V AC/DC power by bus KNX.
Maximum connection distance per input	100 m	- In this way, push buttons, switches or conventional automatic controls can become communicating devices.
Minimum contacts closing time	50 ms	- 6 independent channels with automatic recognition of the type of connected circuit (24...230V AC/DC or circuit free of potential).
Supply voltage	30V DC	- It is possible to connect 5 illuminated push buttons per channel
Busline max consumption	7 mA	
Width	6 modules	
Operating temperature	0°C to +45°C	
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
light grey	TXA306	1

10-channel input module

Signal voltage	230V AC 50 Hz max
Maximum connection distance per input	100 m
Minimum contacts closing time	18 ms
Low signal level	0 -> 100 V
High signal level	> 195 V
Supply voltage	30V DC
Busline max consumption	15 mA
Width	6 modules
Operating temperature	0°C to +45°C
Connections	0.75 to 2.5 mm ²

- Universal input modules allow interfacing 230V AC contacts supplied by KNX bus
- In this way, push buttons, switches or conventional automatic controls can become communicating devices
- 10 independent channels can be connected on different phases

Design	Order no.	PU
light grey	TXA310	1

Time switches

2-channel electronic time switches weekly cycle

Supply voltage	Bus 30 V DC
Consumption	9.5 mA max (TXA022) 10 mA max (TXA023)
IP	20
Operating temperature	-5 °C to 45°C
Size	2 modules

- Product delivered with current time and date set.
- Automatic change of winter / summer time
- Programming key:
 - for permanent overrides,
 - for program copy or save
- Programming for day or group of days
- 56 program steps On, Off, 1 s to 30 min pulse or options
- Permanent overrides On or Off (permanent light on).
- ON or OFF temporary priority settings, using configuration tools
- Temporary overrides On or Off (flashing)
- Holiday mode : overrides On or Off between two dates
- Simulation of presence
- Display bar graph of daily profile for both channels.
- Keyboard locking possible
- Programmable with power off
- DCF Synchronization (only for TXA023)
- Possible transmission of date and time on the bus

Design	Order no.	PU
weekly time switch	TXA022	1
weekly time switch with DCF	TXA023	1

4-channel programmer annual and weekly cycle with programming key

Supply voltage	21...32 V DC SELV
Bus consumption	max. 25mA
IP	20
Operating temperature	-10 °C to 50°C
Size	4 modules

- Product delivered with current time and date set.
- Automatic change of winter / summer time
- Programming key:
 - for permanent overrides,
 - for program copy or save
- Programming for day or group of days
- 300 program steps On, Off, \perp or $\perp\perp$
- Permanent overrides On or Off (☑ permanent light on).
- Temporary overrides On or Off (⚡ flashing)
- Overrides (temporary, permanent or time delayed) remote activation possible.
- Simulation of presence
- Keyboard lock function by PIN number
- Counter of operating time on every output
- Programmable with power off
- Display with backlight

Consumption indicator and energy meters

KNX consumption indicator

Bus power supply	30 V DC (TBTS)
Mains power supply	230 V AC +10/-15% 50 Hz
Max. consumption on the bus	15 mA to 30 V DC
Dissipated output	0.5 W max
Connection capacity:	
- for the upper terminals	0.75 to 2.5 mm ²
- for the lower terminals	0.2 to 1.5 mm ²
IP	20
Operating temperature	-5 °C to 45°C
Size	6 modules

The consumption indicator informs users of their consumption through 4 metering channels. It is used to monitor and control energy consumption and is built into an automatic global energy management system.

- This product can be used in a single-phase or three-phase installation. In three-phase, consumption is measured phase by phase
- The data is sent on the KNX bus
- In addition to metering, the consumption indicator also has:
 - 1 tariff input T1/T2
 - a temperature input for the connection of a probe
- The system can be constructed with several TE330. This thus makes it possible to measure one or more circuits using toroids
- The consumption indicator is adapted for use with domovea. In this case, the display devices are:
 - meter (consumption)
 - meter (production)
 - energy
 - power
 - sub-counter (consumption)
- It can also be interfaced with the ambiance units or other display systems thanks to objects sent on the KNX bus
- It is used to display the current tariff and the energy consumption according to the current tariff. The tariff can also be distributed to other devices on the bus
- Includes 3 current transformers and straps.

Design	Order no.	PU
without current transformer	TE332	1
with current transformer	TE331	1

Current transformer 1850 - 1A

CT ratio	up to 90 A
Operating range	0.2 ... 90 A
Connection capacity (flexible)	0.5 mm ²

Suitable for	Order no.	Page
KNX consumption indicator	TE33.	124

Design	Order no.	PU
current transformer	EK028	1

Three phase energy meter, direct reading 100A

Voltage	230 V AC 50/60 Hz
Starting current	80 mA
Base current	20 A
Max current	100 A

Energy meters are aimed to measure the active energy consumed by an installation.

They permit to have under control the real cost of an installation and to divide the consumption between the different appliances.

- Fully compliant with the european standard EN50470-3.
- Class B.
- Accuracy 1%
- Energy readout : 7 digits.
- Backlighted display
- Indication of instantaneous power consumption
- Total / partial counter (excepted MID references)
- Pulsed output
- unlimited saving of measures.
- LED flashing according to consumption.
- Option : tarif 1 / tarif 2.
- Three phases energy meters are adapted to all kind of networks.
- Display indication in case of bad wiring.

Design	Order no.	PU
light grey	TE360	1

Three phase energy meters, connection via current transformers

Voltage	230/400 V AC 50/60 Hz	- Fully compliant with the european standard EN50470-3.
Starting current	10 mA	- Class B.
Max current on CT secondary	6A	- Accuracy 1%

Energy meters are aimed to measure the active energy consumed by an installation.

They permit to have under control the real cost of an installation and to divide the consumption between the different appliances.

- Energy readout : 7 digits.
- Backlighted display
- Indication of instantaneous power consumption
- Total / partial counter (excepted MID references)
- Pulsed output
- unlimited saving of measures.
- LED flashing according to consumption.
- Option : tarif 1 / tarif 2.
- Three phases energy meters are adapted to all kind of networks.
- Display indication in case of bad wiring.

KNX impuls gateway

Powering through the bus	20 to 30 V $\overline{\text{---}}$ TBTS	- An integrated battery ensures metering for 30 days of bus cutout and data backup.
Bus consumption	TXE771: 7 mA max (6 mA typ) TXE773: 8 mA max (6 mA typ)	- The input not only allows interfacing S0 signals of type EN62053-31 and EN1434-2, EN1434-3 but also potential free contacts.
Battery capacity	1.2 Ah	- The gateways transmits the metering data from the flow or energy sensors to the bus.
Protection index	IP44	- Pulse visualizer LED
Operating temperature	-20°C to +55°C	- Synchronization with the existing electricity tariff through the bus possible with KNX TE331 consumption indicators
Dimensions	150 x 85 x 35 mm	- 1 totalizing meter + 1 partial meter for each measurement category

Powered by the bus, these two gateways count pulses (multi-energy).

- Setting of pulse inputs. Each of the inputs must be set to define the type of measurement category and the weight of the pulses:
 - Volume or energy for calorimetry.
 - Volume for the flowmeter
 - Volume of gas meters
 - Energy for the electric meters

Design	Order no.	PU

Din rail switching actuators

- Common parameter of switching actuator
- Output states are displayed on the product.
- Outputs can be controlled manually from the product
- Each output to be individually configured for Lighting or Heating
- The ON/OFF function is used to switch a lighting circuit ON or OFF
- The Status indication function displays the status of the output contact
- The Timer function is used to switch a lighting circuit ON or OFF for an adjustable time
- The Time delayed switch function combines a toggle function and a cut-off delay
- The Priority function allows overriding an output to a definite status, ON or OFF
- The Jamming function allows locking an output in its current status
- Each output may be integrated into 32 different scenes
- The Timer and Automatic controls function allow the outputs to be controlled by:
 - Timer functions: Timer/toggle change over, Switching delay, Tripping delay, Switching and tripping delay, Timer.
 - Automatic control functions: Authorization, Logical AND or Logical

OR

- Each output may be integrated into 32 different scenes
- Manual override, permanent or Time limited.
- Behavior in the event of bus voltage failure/Return configurable
- With programming button and red programming LED
- Bus connection via connecting terminal
- quickconnection terminal

4-channel switching actuator 4A/10A/16A/16A (Capacitive Load)

Supply voltage	30 V DC	- The 4-fold output module TYA604. are relays designed to interface Bus KNX with on/off electric loads
Power dissipation	1 W (TYA204A) 3 W (TYA204B) 8 W (TYA204C) 8 W (TYA204D)	- 4 volt-free contacts
Width	4 modules	
Operating temperature	0°C to +45°C	
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
switching actuator 4A	TYA604A	1
switching actuator 10A	TYA604B	1
switching actuator 16A	TYA604C	1
switching actuator 16A for capacitive load	TYA604D	1

6-channel switching actuator 4A/10A/16A/16A (Capacitive Load)

Supply voltage	30 V DC	- The 6-fold output module TYA606. are relays designed to interface Bus KNX with on/off electric loads
Power dissipation	1 W (TYA206A) 5 W (TYA206B) 12 W (TYA206C) 12 W (TYA206D) 6 W (TYA206E)	- 6 volt-free contacts
Width	4 modules 6 modules (TYA606E)	
Operating temperature	0°C to +45°C	
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
switching actuator 4A	TYA606A	1
switching actuator 10A	TYA606B	1
switching actuator 16A	TYA606C	1
switching actuator 16A for capacitive load	TYA606D	1
switching actuator 16A for capacitive load with current monitoring	TYA606E	1

8-channel switching actuator 4A/10A/16A/16A (Capacitive Load)

Supply voltage	30 V DC	- The 8-fold output module TYA608. are relays designed to interface Bus KNX with on/off electric loads
Power dissipation	2 W (TYA206A) 6 W (TYA206B) 12 W (TYA206C) 12 W (TYA206D)	- 8 volt-free contacts
Width	6 modules	
Operating temperature	0°C to +45°C	
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
switching actuator 4A	TYA608A	1
switching actuator 10A	TYA608B	1
switching actuator 16A	TYA608C	1
switching actuator 16A for capacitive load	TYA608D	1

10-channel switching actuator 4A/10A/16A/16A (Capacitive Load)

Supply voltage	30 V DC	- The 10-fold output module TYA610. are relays designed to interface Bus KNX with on/off electric loads
Power dissipation	3 W (TYA206A) 7 W (TYA206B) 15 W (TYA206C) 15 W (TYA206D)	- 10 volt-free contacts
Width	6 modules	- Each output to be individually configured for Lighting or Shutters/Blinds applications
Operating temperature	0°C to +45°C	- Shutters/Blinds applications required two Output Channel
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
switching actuator 4A	TYA610A	1
switching actuator 10A	TYA610B	1
switching actuator 16A	TYA610C	1
switching actuator 16A for capacitive load	TYA610D	1

Output 16A C-Load adapted / shutter / blind

Supply voltage KNX	DC21...32 V SELV	The device receives telegrams from sensors or other controllers via the KNX installation bus and switches electrical loads with its independent relay contacts. The devices are particularly suitable for capacitive loads and are designed for high-load currents.
Power dissipation	max. 20 W (TYM616D) max. 25 W (TYM620D)	
Width	8 modules (TYM616D) 10 modules (TYM620D)	
Operating temperature	-5°C to +45°C	
Connections	0.5 to 6 mm ² (rigid) 0.5 to 4 mm ² (flexible)	

Design	Order no.	PU
output 16A C-Load 16gang	TYM616D	1
output 16A C-Load 20gang	TYM620D	1

Multi-application outputs module 10 A

Supply voltage KNX	DC21...32 V SELV
Minimum switching current	100 mA
230 V AC shutter motors	6 A max
230 V AC fan-coil unit motors	4 A max
24 V DC shutter motors	6 A max
Surge voltage	4 kV
Protection rating (box)	IP20
Protection rating of box under faceplate	IP30
Width	10 modules
Operating temperature	-5°C to +45°C
Screw terminal connection	0.75 to 4 mm ²

The device receives telegrams from sensors or other controllers via the KNX installation bus and switches electrical loads with its independent relay contacts.

Design	Order no.	PU
Multi-application outputs module 10 A	TYF616	1

Busbars and endcaps for output modules

Cu cross section	6 mm ²
Rated current I _n	16 A 250 V AC
Operating temperature	+5°C to +45°C
Storage temperature	-25°C to +70°C
Moisture resistance	max. 85% RH non-condensing at 20°C
Contact pin (HxWxD)	1 x 2.5 x 12.5 mm

The busbars are used to ease the connection of output relays to a dedicated phase by decrease the necessary time to bridge the phase to the different output relays.

Design	Order no.	PU
busbar for TXM616D, 8-pin busbars	TGM616D	2
busbar for TXM620D, 10-pin busbars	TGM620D	2

Endcaps for output modules

Design	Order no.	PU
endcaps for TGM616D or TGM620D busbars	TGM600E	10 pairs

Din rail dim actuators

Universal dim actuators

- 1 dimming channel controlled by KNX bus.
- Universal dimmer with automatic load recognition
- Min/Max level local setting.
- Display of channel state on the product.
- Manual mode that allows dimming even when the bus is disconnected.
- Control button for manual mode.
- Per channels 32 light scenes with a related scene speed
- Short-circuit, over heating & overload protection with LED indication
- With programming button and red programming LED in same button.
- Bus connection via connecting terminal.
- quickconnect terminal.

1-channel universal dimmer 300W

Supply voltage	30 V DC 230 V AC 50/60 Hz
Busline max consumption	2.3 mA
Consumption without load	3 W
Power dissipation	4 W
Width	4 modules
Operating temperature	-5°C to +45°C
Connections	0.75 to 2.5 mm ²

- 230 V incandescent and halogen lamps 300W
- Halogen ELV (12 or 24V) via ferromagnetic transformer suitable for dimming 300VA.
- Halogen ELV (12 or 24V) via electronic transformer suitable for dimming 300W
- Dimmable CFL lamp (CFLi) with integrated ballast suitable for dimming 60W
- Dimmable LED lamp(LEDi) with integrated ballast suitable for dimming 60W

Design	Order no.	PU
light grey	TYA661AN	1

1-channel universal dimmer 600W

Supply voltage	30 V DC 230 V AC 50/60 Hz	- 230 V incandescent and halogen lamps 600W - Halogen ELV (12 or 24V) via ferromagnetic transformer suitable for dimming 600VA.
Busline max consumption	2.3 mA	- Halogen ELV (12 or 24V) via electronic transformer suitable for dimming 600W
Consumption without load	3 W	- Dimmable CFL lamp (CFLi) with integrated ballast suitable for dimming 120W
Power dissipation	7.5 W	- Dimmable LED lamp (LEDi) with integrated ballast suitable for dimming 120W
Width	4 modules	
Operating temperature	-5°C to +45°C	
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
light grey	TYA661BN	1

2-channel universal dimmer 300W

Supply voltage	230 V AC 50/60 Hz	- 230 V incandescent and halogen lamps 300W - Halogen ELV (12 or 24V) via ferromagnetic transformer suitable for dimming 300VA.
Busline max consumption	2.3 mA	- Halogen ELV (12 or 24V) via electronic transformer suitable for dimming 300W
Consumption without load	300 mW	- Dimmable CFL lamp (CFLi) with integrated ballast suitable for dimming 60W
Power dissipation per output	2 W	- Dimmable LED lamp(LEDi) with integrated ballast suitable for dimming 60W
Width	4 modules	
Operating temperature	-5°C to +45°C	
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
light grey	TYA662AN	1

3-channel universal dimmer 300W

Supply voltage	30 V DC 230 V AC 50/60 Hz	- 1, 2, or 3 dimming channels controlled by KNX bus. - The product can control 1, 2 or 3 independent lighting circuits, the outputs number depends on the switch position.
Busline max consumption	2.3 mA	- 230 V incandescent and halogen lamps 300W, 600W, 900W according to output selector switch per channel.
Consumption without load	5 W	- Halogen ELV (12 or 24V) via ferromagnetic transformer suitable for dimming 300W, 600W, 900W according to output selector switch per channel.
Power dissipation	8.9 W	- Halogen ELV (12 or 24V) via electronic transformer 300W, 600W, 900W according to output selector switch per channel.
Width	6 modules	- Dimmable CFL lamp (CFLi) with integrated ballast suitable for dimming 210W, 120W, 60W according to output selector switch per channel.
Operating temperature	-5°C to +45°C	- Dimmable LED lamp (LEDi) with integrated ballast suitable for dimming 210W, 120W, 60W according to output selector switch per channel.
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
light grey	TYA663AN	1

4-channel universal dimmer 300W

Supply voltage	30 V DC 230 V AC 50/60 Hz	- 230 V incandescent and halogen lamps 300W - Halogen ELV (12 or 24V) via ferromagnetic transformer suitable for dimming 300VA.
Busline max consumption	2.3 mA	- Halogen ELV (12 or 24V) via electronic transformer suitable for dimming 300W
Consumption without load	1 W	- Dimmable CFL lamp (CFLi) with integrated ballast suitable for dimming 60W
Power dissipation	7.5 W	- Dimmable LED lamp(LEDi) with integrated ballast suitable for dimming 60W
Width	8 modules	
Operating temperature	-5°C to +45°C	
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
light grey	TYA664AN	1

4-channel universal dimmer 600W

Supply voltage	30 V DC 230 V AC 50/60 Hz	- 230 V incandescent and halogen lamps 600W - Halogen ELV (12 or 24V) via ferromagnetic transformer suitable for dimming 600VA.
Busline max consumption	2.3 mA	- Halogen ELV (12 or 24V) via electronic transformer suitable for dimming 600W
Consumption without load	1 W	- Dimmable CFL lamp (CFLi) with integrated ballast suitable for dimming 120W
Power dissipation	8.9 W	- Dimmable LED lamp(LEDi) with integrated ballast suitable for dimming 120W
Width	10 modules	
Operating temperature	-5°C to +45°C	
Connections	0.75 to 2.5 mm ²	
Design	light grey	Order no. TYA664BN PU 1

1 - 10 V / DALI interfaces

3-channel 1 - 10 V dimmer

Supply voltage	30 V DC 230 V AC 50/60 Hz	- 3 dimming channels controlled by bus KNX - Control lighting circuits via a 1/10V connection, acting upon remote control dimmers or electronic ballasts
Busline max consumption	2.3 mA	- Min/Max level local setting
Consumption without load	3 W	- State of channel displayed on product
Power dissipation	9 W	- Manual control of channels available locally on the product for Wiring, testing and start-up
Control current per channel	50 mA max	- After power on, a 20-sec delay is required for the dimmer switch to perform the first control operation
Switching current	16A	- With potential-free NO contacts
230 V incandescent and halogen lamps	2300 W	- Basic brightness programmable
Halogen ELV (12 or 24V) via ferromagnetic transformer/ electronic transformer	1500 VA / 1500 W	- Behavior in the event of bus voltage failure configurable
Electronic Ballast 1-10V	1000 W	- With programming button and red programming LED
Dimmable Electronic Ballast	50 mA max	- Bus connection via connecting terminal
Light Dimmer	30 max	- With screw terminals
Width	4 modules	
Operating temperature	0°C to +45°C	
Connections	1 to 6 mm ² (screw terminal)	
Design	light grey	Order no. TX211A PU 1

KNX DALI-Gateway

KNX supply voltage	21 ... 32 V DC SELV	- Control of a maximum of 64 DALI devices in a max. of 32 groups
External supply voltage	110...240 V AC +10%/-15% 50/60 Hz	- Manual control of the groups independent of the bus (site operation with broadcast control)
Busline max consumption	typically 150 mW	- Feedback of DALI error status or short-circuit and supply voltage failure message
Power consumption	max. 6 W	- Central switching function
Total power loss	max. 3 W	- Incorporation of the groups into up to 16 lightscenes possible
Operating temperature	-5°C to +45°C	- All channel-oriented functions can be parameterized separately for each group. This feature permits independent and multi-functional control of the DALI devices
Connections	screw terminal preferably on top	- The Staircase timer function can only be parameterized for groups 1 ... 16
DALI voltage	typically 16 V DC with overvoltage protection	- Adjusting the limit values for brightness is possible.
DALI current	typically 128mA max. 200mA temporarily	- Dimming response can be parameterized.
		- Soft-On or Soft-Off function
		- Disable function or, alternatively, forced-control position function can be parameterized for each group, with the disable function, blinking of lighting groups is possible
		- Timer functions (ON-delay, OFF-delay, staircase lighting function, also with pre-warning function)
		- Response to bus voltage failure and bus voltage return as well as after ETS programming can be adjusted for each group
		- Automatic device replacement
		- With programming button and red programming LED
		- Bus connection via connecting terminal
		- With screw terminals preferably on top
Design	light grey	Order no. TYA670D PU 1

3-channel LED controller

3-channel LED controller - voltage controlled

Supply voltage	12-24 V DC	- 3 variation channels controlled by the KNX bus
Maximum charge	2.2 A / channel	- 60 scenes called up by the KNX bus
Max power	12V DC 80 W 24V DC 155 W	- 4 different colour sequences including up to 12 colours per sequence.
Control mode	direct voltage	- Short circuit protection
Number of channel	1-3	- Overheating protection
Control signal	KNX	- Electrical surge protection
Consumption on the KNX bus	Max. 12 mA	- Polarity reversal protection
Operating temperature	-5°C to +45°C	
Connections	KNX wire 0.75 to 1.5 mm ² (screw-on terminal block)	
Output signal	PWM / 600Hz	
Max. cable length	10 m	
Protection degree	IP20	

The TYB673A 3-channel LED controller can be used to vary the luminosity of a voltage controlled LED module. This product can be used more particularly to control a coloured lighting system, create lighting effects or launch a sequence of pre-programmed colours.

Design	Order no.	PU
black	TYB673A	1

3-channel LED controller - current controlled

Supply voltage	24 V DC	- 3 variation channels controlled by the KNX bus
Output current	350/500/700 mA	- 60 scenes called up by the KNX bus
Control mode	direct current	- 4 different colour sequences including up to 12 colours per sequence.
Max output voltage	22V DC	- Short circuit protection
Number of channel	1-3	- Overheating protection
Control signal	KNX	- Electrical surge protection
Consumption on the KNX bus	Max. 12 mA	- Polarity reversal protection
Operating temperature	-5°C to +45°C	
Connections	KNX wire 0.75 to 1.5 mm ² (screw-on terminal block)	
Output signal	PWM / 600Hz	
Max. cable length	10 m	
Protection degree	IP20	

The TYB673B 3-channel LED controller can be used to vary the luminosity of a current controlled LED module. This product can be used more particularly to control a coloured lighting system, create lighting effects or launch a sequence of pre-programmed colours.

Suitable for Power supply 24 V DC 1A	Order no. TGA200	Page 140

Design	Order no.	PU
black	TYB673B	1

Din rail blind actuators

- Outputs can be controlled manually from the product
- Output states are displayed on the product
- Delay time between 2 opposite directions 600 ms.
- Application softwares allow each output to be individually configured for Shutter/Blind applications.
- The Up/Down Function allows moving up or down a shutter, a blind with inclinable slats, an awning, a Venetian blind, etc.
- The Up/Down function also allows opening and closing electric curtains.
- The Slat angle/Stop function allows inclining the slats of a blind or stopping its current movement.
- The Slat angle/Stop function allows modifying the occultation or the direction of the light beams coming from outside.
- The Stop function allows stopping the current shutter movement.
- The Position in % function allows putting a shutter or a blind in a desired position expressed in % of closure.
- The Slat angle function allows inclining the slats of a blind into a desired position expressed in degrees (0° to 180°).
- Wind alarm and rain alarm functions allow putting a shutter or a blind in a configurable predefined status.
- The Priority function allows forcing a shutter or a blind into a predefined position.
- The Jamming function allows locking a shutter or a blind in its current position.
- Each output may be integrated into 32 different scenes.
- The Status indication function allows sending on the bus:
 - Status indication (1 byte): indicates the current operating mode of the output (Alarm, Priority, Jamming, and Normal)
 - Position indication in %: indicates the position of the shutter or blind
 - Slat angle indication in °: indicates the position of the shutter or blind
 - Status indication (1Bit): indicates the last movement, up or down, of the shutter or blind

Output device for 4 shutters 230V AC

Supply voltage	30 V DC SELV	- 4 independent channels controlled by bus KNX.
Power dissipation	2W	- Output states are displayed on the product.
Typical consumption on the KNX bus	5,2 mA	- Outputs can be controlled manually from the product.
Standby consumption on the KNX bus	4,5 mA	Each product feature depends on its configuration and settings.
Width	4 modules	
Operating temperature	-5°C to +45°C	
Connections	0.75 to 2.5 mm ²	
Breaking capacity	μ230 V, 6A AC1	
Surge voltage	4kV	
Protection degree	IP20	

The 4-output drivers TYA624A and TYA624C are actuators that allow interfacing Bus KNX with opening devices. They are part of the tebis Installation System and are designed to control such devices as rolling shutters, blinds with awnings, blinds with slats, etc.

Design	Order no.	PU
output device for 4 shutters	TYA624A	1
output device for 4 shutters and / or blinds	TYA624C	1

Output device for 4 shutters 24V DC

Supply voltage	30 V DC SELV
Power dissipation	2W
Typical consumption on the KNX bus	5,2 mA
Standby consumption on the KNX bus	4,5 mA
Width	4 modules
Operating temperature	-5°C to +45°C
Connections	0.75 to 2.5 mm ²
Breaking capacity	μ 24V DC 6A DC1
Surge voltage	4kV
Protection degree	IP20

- 4 independent channels controlled by bus KNX.
 - output states are displayed on the product.
 - outputs can be controlled manually from the product.
- Each product feature depends on its configuration and settings.

Suitable for Optional	Order no.	Page
Power supply 24 V DC 1A	TGA200	140

The 4-output drivers TYA624B and TYA624D are actuators that allow interfacing Bus KNX with opening devices. They are part of the tebis Installation System and are designed to control such devices as rolling shutters, blinds with awnings, blinds with slats, etc.

Design	Order no.	PU
output device for 4 shutters	TYA624B	1
output device for 4 shutters and / or blinds	TYA624D	1

Output device for 8 shutters 230V AC

Supply voltage	30 V DC SELV
Power dissipation	2W
Typical consumption on the KNX bus	15.8 mA
Standby consumption on the KNX bus	8.8 mA
Width	6 modules
Operating temperature	-5°C to +45°C
Connections	0.75 to 2.5 mm ²
Breaking capacity	μ230 Vv 6A AC1
Surge voltage	4kV
Protection degree	IP20

- 8 independent channels controlled by bus KNX.
 - product display of outputs status with or without the presence of bus and/or main supply (230V-).
 - the outputs may be switched with or without the presence of bus and/or main supply (230V-).
- Each product feature depends on its configuration and settings.

The 8-output drivers TYA628A and TYA628C are actuators that allow interfacing Bus KNX with opening devices. They are part of the tebis Installation System and are designed to control such devices as rolling shutters, blinds with awnings, blinds with slats, etc.

Design	Order no.	PU
output device for 8 shutters	TYA628A	1
output device for 8 shutters and / or blinds	TYA628C	1

Output 12-gang shutter/blind 230V AC

Rated voltage KNX	30 V DC SELV
Power dissipation	3W
Typical consumption on the KNX bus	7 mA
Standby consumption on the KNX bus	5 mA
Width	10 modules
Operating temperature	-5°C to +45°C
Connections	0.5 to 6 mm ²
Breaking capacity	μ230 V, 4A AC1
Surge voltage	4kV
Protection degree	IP20

- independent outputs, activation via KNX bus
- status display of the outputs on the device
- manual activation of the outputs on the device possible, building site operation
- position can be started directly
- 3 alarms
- scene function
- forced position by higher-level controller
- connection of various external conductors possible
- slat position directly controllable

The device is used to control motor-operated building fittings such as shutters and blinds via the KNX bus. The device has 12 outputs from which each output can be activated independently.

Design	Order no.	PU
output device for 12 shutters/blinds	TYM632C	1

Modular blind actuators

2 flush mounted output / 1 shutter/blinds 6A twisted pair

Supply voltage KNX	21...32 V DC SELV
Typical consumption on the KNX bus	7 mA
Standby consumption on the KNX bus	5 mA
Dimensions	44 x 43 x 22.5 mm
Operating temperature	-5°C to +45°C
Connections	0.75 to 2.5 mm ²
Breaking capacity	μ6A AC1 230V~
Surge voltage	4kV
Protection degree	IP20

The device receives telegrams from sensors or other controllers via the KNX installation bus and switches electrical loads with its relay contact.

Design	Order no.	PU
flush mounting	TYB602F	1

1 flush mounted output for shutter/blinds / 2 outputs + 2 inputs

Supply voltage KNX	21...32 V DC SELV
Typical consumption on the KNX bus	7 mA
Standby consumption on the KNX bus	5 mA
Dimensions	44 x 43 x 22.5 mm
Operating temperature	-5°C to +45°C
Connections	0.75 to 2.5 mm ²
Breaking capacity	μ6A AC1 230V~
Surge voltage	4kV
Protection degree	IP20

The device receives telegrams from sensors or other controllers via the KNX installation bus and switches electrical loads with its relay contact.

Design	Order no.	PU
flush mounting	TYB692F	1

Output 1-gang 10A, flush mounted

Supply voltage	21...32 V DC SELV
Typical consumption on the KNX bus	7 mA
Standby consumption on the KNX bus	5 mA
Dimensions	44 x 43 x 22.5 mm
Operating temperature	-5°C to +45°C
Connections	0.75 to 2.5 mm ²
Breaking capacity	μ10A AC1 230 V ~
Surge voltage	4kV
Protection degree	IP20

The device receives telegrams from sensors or other controllers via the KNX installation bus and switches electrical loads with its relay contact.

- Time switching functions.
- manual activation of the outputs on the device possible, building site operation.
- Status display of the outputs on the device.
- Scene function.
- Forced position by higher-level controller.

Design	Order no.	PU
light grey	TYB601B	1

Universal dim actuator 1-gang flush-mounted

Rated voltage KNX	21...32 V DC SELV
Mains frequency	50 / 60 Hz
Rated voltage	AC 230 V ~
Incandescent lamps	50 ... 210 W
HV halogen lamps	50 ... 210 W
Inductive transformers	50 ... 210 VA
Tronic transformers	50 ... 210 W
Operating temperature	-5 °C...+45 °C
Dimensions	Ø 53 x 28 mm

- automatic selection of the dimming principle suitable for the load
- protected against no-load, short-circuit and overheating
- feedback of the switching position and the dimming value
- configurable switch-on and dimming behaviour
- Timed dimmer: switch-on delay, switch-off delay, staircase lighting timer
- Light scene operation
- Two binary inputs for potential-free contacts, usable as extension inputs for local operation
- Supply via bus, no additional power supply necessary
- Mains failure longer than approx. 0.7 seconds leads to switch-off of the dimmer actuator.

Design	Order no.	PU
light grey	TYB691F	1

Din rail HVAC actuators

Din rail heating actuator 6-gang 230 V

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	230/240 V~
Frequency	50/60 Hz
Switching current at 250 V~	max. 50 mA
Actuators per channel	max. 4
Operating temperature	-5 ... +45 °C
Assembling height as from DIN rail	58 mm
Dimensions (W x H x D)	72 x 90 x 65 mm
Width of rail mounted device (RMD)	4 TE

- valve drives for thermoelectric valve drives 230 V, closed in de-energized state
- for individual single room temperature control
- for continuous (PI) or switched (2-point) control
- with programming button and red programming LED
- bus connection via connecting terminal
- with emergency programme, e.g. for sensor or bus failure
- with screw terminals

Suitable for	Order no.	Page
KNX valve drive 230V	EK723	136
KNX valve drive 24V AC/DC	EK724	136

Din rail fan coil actuator 2-gang

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	230 V~
230 V incandescent lamps	2300 W
230 V halogen lamps	2300 W
Conventional transformers	1200 W
Electronic transformers	1500 W
Fluorescent lamps:	
- uncompensated	1000 W
- parallel compensated	1160 W /140 µF
Operating temperature	-5 ... +45 °C
Assembling height as from DIN rail	63 mm
Dimensions (W x H x D)	72 x 90 x 70 mm
Width	4 modules

- for the electric activation of fan convectors
- for converting RTR control variables into valve positions, fan stages
- activation of 1 or 2 fan channels with 6 or 3 fan stages
- for operating modes heating/cooling or heating and cooling
- manual activation of blow fans using push-buttons or the operating panel
- use of free channels to control switching loads
- 4 manual operation buttons for controlling fan stages and bus function on/off
- manual operating also possible without bus e.g. on building site
- with programming button and red programming LED
- with 8 red status LEDs and 3 red LEDs as manual actuation indication
- bus connection via connecting terminal
- with screw terminals

Comply with the fan convector manufacturer's instructions.
Optimised for commissioning with ETS3 from version D, patch A.

KNX valve drive

Power supply

bus KNX
30V DC TBTS

- Automatic regulating apparatus and temperature collection apparatus.

Power consumption

< 10 mA

- Work mode: Comfort, Standby, Night time, Frost.

Run time

< 20 s/mm

- Oriented start up

Set force

> 120N

- Forced service

Maximal stroke

6 min

- Summer operation

Target value display

5 LEDs

Operating temperature

0°C to +50°C

Dimensions

82 x 50 x 65 mm

Design

Analogue actuators

Din rail analogue actuator 4-gang

Operating voltage over bus	21 ... 32 V=	– with green/red status LED (operation/fault)
Auxiliary voltage	24 V~	– with red programming LED
Frequency	50/60 Hz	– channels can be adjusted independently
Output load voltage	> 1 kΩ	– with programming button
Voltage, outputs	0 ... 1; 0 ... 10 V	– expandable with 4gang analogue actuator module
Output current per channel	max. 20 mA	– bus connection via connecting terminal
Current consumption	max. 170 mA	– initial status via status- and/or switch object evaluable
Outputs current	0 ... 20, 4 ... 20 mA	– with 4 independant analogue outputs
Output load current	< 500 Ω	– cyclic supervision of the outputs
Forced controls (1-bit objects)	per channel 2	– with screw terminals
Operating temperature	-5 ... +45 °C	– with system interface for analogue actuator module
Assembling height as from DIN rail	63 mm	
Dimensions (W x H x D)	72 x 90 x 70 mm	
Width of rail mounted device (RMD)	4 TE	

The analogue actuator receives KNX telegrams and converts them into current and/or voltage signals, e.g. for heating, air conditioning and ventilation systems.
Output signals according to DIN IEC 381

Design	Order no.	PU
light grey	TYF684	1

4-channel analogue actuator module

Operating voltage over bus	21 ... 32 V=	– with 4 yellow output status LEDs
Auxiliary voltage	24 V~	– with green/red status LED (operation/fault)
Frequency	50/60 Hz	– as extension for analogue actuator 4gang
Output load voltage	> 1 kΩ	– with 4 independant analogue outputs
Voltage, outputs	0 ... 1; 0 ... 10 V	– cyclic supervision of the outputs
Output current per channel	max. 20 mA	– with screw terminals
Current consumption	max. 170 mA	– with system plug for connection to the analogue actuator system interface
Outputs current	0 ... 20, 4 ... 20 mA	
Output load current	< 500 Ω	
Forced controls (1-bit objects)	per channel 2	
Operating temperature	-5 ... +45 °C	
Assembling height as from DIN rail	63 mm	
Dimensions (W x H x D)	72 x 90 x 70 mm	
Width of rail mounted device (RMD)	4 TE	

Output signals according to DIN IEC 381

Design	Order no.	PU
light grey	TYF684E	1

Actuators, flush/surface-mounted

Heating actuator 230 V flush-mounted

Operating voltage	21 ... 32 V=	– binary input functions: Switching, dimming, shutter control and value transmitter
Switching current for electronic outputs	max. 25 mA	– for individual single room temperature control
Actuators per channel	max. 2	– for continuous (PI) or switched (2-point) control
Operating temperature	-5 ... +45 °C	– with programming button and red programming LED
Load cable length	≈ 20 cm with 2 x 1,5 mm ²	– 1 electronic output (triac) for connection of 230V thermoelectric actuator drives
Cable length, bus + inputs (extendable to max. 5 m)	≈ 33 cm	– with 3 independent binary inputs for potential-free contacts
Dimensions (Ø x H)	53 x 28 mm	– with emergency programme, e.g. for sensor or bus failure
Optimised for commissioning with ETS3 from version D, patch A.		– installation in flush-mounted or splash-protected junction box
		– pre-assembled, with cables

Design	Order no.	PU
light grey	TYB641A	1

Window interface / flush-mounted

Rated voltage KNX	DC 21 V ... 32 V SELV	- control of Venetian blinds, awnings and similar blinds
Switching current	5 ... 25 mA	- control of electrothermal actuators
Motors 230 V	600 VA	- three binary inputs for potential-free contacts, usable as extension inputs for local operation
Rated voltage	230 / 240 V ~	- supply via bus, no additional power supply necessary
Number of drives per output	max. 2	
Operating temperature	-5 to +45°C	
Dimensions	Ø 53 x 28 mm	

Design	Order no.	PU
Window interface / flush-mounted	TYB692C	1

Heating actuator 6 channels

Supply voltage	230V AC	- for valve drives 24 V, closed in de-energized state
Bus KNX	30V DC TBTS	- with on red heat request LED per channel
Max. power uptake	50W	- with green operation LED and red programming LED
Bus power consumption	< 10mA	- with red fuse LED
Standard fuse	T 2A	- with integral transformer
Max. number of actuators	13	- bus connection via connecting terminal
Operating temperature	-5 to +40 °C	- with emergency programme, e.g. for sensor or bus failure
Dimensions (W x H x D)	302 x 75 x 70 mm	- short-circuit and overload proof (fine-wire fuse)
Frequency	50/60 Hz	- with plug-in terminals
		- for individual single room temperature control
		- for continuous (PI) or switched (2-point) control

Design	Order no.	PU
grey, 6-gang Triac	TX206H	1

Room actuator

4-gang room actuator

KNX supply	21...32 V DC	- switching of electrical consumers AC 230 V with potential-free contacts
KNX power consumption	max. 150 mW	- switching of electrically operated blinds, shutters, awnings and similar curtains
Rated voltage	230/240 V	- heating outputs: electronic outputs for switching electro-thermal adjustment drives
Mains frequency	50/60 Hz	- installation on DIN rails in small distribution boards
Heat dissipation	max. 6 W	
Width	4 modules	
Operating temperature	-5°C to +45°C	
Connections	0.5 to 4 mm ² (single-wire) 0.35 to 4 mm ² (standed wire without ferrule) 0.14 to 2.5 mm ² (standed wire with ferrule)	

Design	Order no.	PU
light grey	TYF646M	1

Power supplies

- With integral choke
- Short-circuit and overload protection
- The “OK” indicator lights up in normal working mode
- The “I>Imax” indicator lights up, eliminate the origin of the fault (short circuit or overload)
- Protected earth conductor must be connected
- quickconnect terminal

Power supply 320 mA RMD

Supply voltage	230V AC 50/60 Hz
Output voltage	30V DC
Output current max.	320 mA
Absorbed power	15 VA
Width	4 modules
Operating temperature	-5 ... +45°C
Connections	quickconnect 0.75 to 2.5 mm ²

Design	Order no.	PU
light grey	TXA111	1

Power supply 640 mA RMD

Supply voltage	230V AC 50/60 Hz
Output voltage	30V DC
Output current max.	640 mA
Absorbed power	24 VA
Width	4 modules
Operating temperature	-5 ... +45°C
Connections	quickconnect 0.75 to 2.5 mm ²

Design	Order no.	PU
light grey	TXA112	1

Power supply 1x30V, 320 mA + 1x24V, 640 mA RMD

Supply voltage	230V AC 50/60 Hz
Output voltage	30V DC and 24 V DC
Output current max.	320 mA and 640 mA
Absorbed power	4.4 W
Width	4 modules
Operating temperature	-5 ... +45°C
Connections	quickconnect 0.75 to 2.5 mm ²

Suitable for	Order no.	Page

Safety transformer

Supply voltage	230V AC 50/60 Hz	These transformers are designed to ensure personal safety, their primary winding are electrically separated from their secondary windings and they are intended to feed safety extra low voltage circuits $U \leq 50V$. A thermal overload, in the primary windings, ensures that if a short circuit or an overload occurs in the output it will not damage the device.
Nominal power	25 VA	
Galvanic insulation	4 kV	
Width	4 modules	
Max. operating temperature	+35°C	

Suitable for	Order no.	Page
Analogue input 4gang RMD	TYF784	117
KNX weather station	TG053A	116
Router IP/KNX	TH210	141
IP/KNX interface	TYF120	141

Design	Order no.	PU
light grey	ST312	1

Couplers

Line coupler

Operating voltage	21 - 32 V DC	- can be used as line/area coupler or line amplifier.
Width	2 modules	- with programming button.
Operating temperature	-5 ... +45°C	- with green operation LED, red programming LED and red diagnosis LED.
		- with 2 yellow data traffic LEDs for higher and lower ranking line.
		- allows extension of a wire line and repeats the messages.
		- ensures a galvanic insulation between lines.
		- necessary in case of systems with more than 64 wire products.
		- line connection via connecting terminal

Design	Order no.	PU
light grey	TYF130	1

Router IP/KNX

Supply voltage	KNX bus (21 -30V DC)	- quick communication of lines/areas and systems via data networks (Internet protocols).
External SELV power	24V AC/DC (12-30V AC/DC)	- needed for operation a power supply of 24 V DC.
Supply:	1.6 GHz	- as interface to PCs and data processing devices.
- power usage from the bus line	10mA max 30V DC	- for reporting bus voltage failure via data networks.
- power usage from the auxiliary power supply	800mW max (25mA - 24V DC)	- internet protocols supported: ARP, ICMP, IGMP, UDP/IP, and DHCP.
Operating temperature	-5°C to 45°C	- IP according to Konnex specifications: Core, Routing, Tunneling, Device Management.
Width	2 modules	- can be used as line/area coupler.
		- with RJ45 connection for Ethernet/IP networks.
		- with programming button and red programming LED.
		- with green operation LED and yellow data traffic LED.
		- with green, yellow and red LEDs for indicating the IP communication.
		- line connection via connecting terminal.
		- operating voltage connection via connecting terminal.

Design	Order no.	PU
Router IP/KNX	TH210	1

IP/KNX interface

Supply voltage	KNX bus (21 -30V DC)	- LED for operation (green) and data transmission on bus line (yellow).
External SELV power	12 - 24V AC; 12 - 30V DC or PoE: Power over Ethernet DC 48V (acc. to IEEE 802.3af)	- green/yellow/red LED for IP communication status
Operating temperature	+5°C to 45°C	- the connection to the KNX bus is established using a standard bus connection terminal.
Width	2 modules	- ethernet / IP network: RJ45

Interface IP/KNX TYF120 is a modular device which can be installed in consumer units. It uses the KNXnet/IP standard and acts as an interface between KNX lines and data networks using Internet Protocol (IP).

Design	Order no.	PU
IP/KNX interface	TYF120	1

Data interfaces

Modular USB interface

Operating voltage	21 - 32 V DC	- for addressing, programming and diagnosis of KNX components.
Data transfer rate	max. 9.6 kBaud	- with B-type USB socket for data traffic (voltage supply via PC)
Operating temperature	-25 to +45°C	- compatible with USB 1.1/2.0 transmission protocols.
Width	2 modules	- with flash-controller technology

Design	Order no.	PU
light grey	TH101	1

KNX data interface USB flush-mounted

Operating voltage over bus	21 ... 32 V=	- programmable from ETS3, V1.0
Data transmission rate	max. 9.6 kBd	- for addressing, programming and diagnosis of KNX components
Operating temperature	-5 ... +45 °C	- with B-type USB socket for data traffic (voltage supply via PC)
USB cable length	max. 5 m	- compatible with USB 1.1/2.0 transmission protocols
For connection of a PC for addressing, programming and diagnosis of KNX components and for visualisation.		- system requirements: Windows 2000 or later
		- without spreader claws
		- with flash-controller technology

KNX remote control and visualisation

Intuitive control: one interface to manage your home. domovea is the dashboard for your home, providing you with intuitive control of the different devices in your home. Lights, shutters, heating, air conditioning or alarm system; for each room or the full floor... It's so simple to use: everything can be controlled from one single point. You can enjoy domovea from your home computer, laptop, smartphone, tablet or dedicated touch panel, all with the same look & feel.

domovea server incl. software

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V=
Current consumption (operation)	≈ 150 mA
Power consumption (operation)	≈ 1.5 W
RAM	128 MB
Graphics memory	≈ 20 MB
Processor	400 MHz
Operating temperature	+0 ... +45 °C
Width of rail mounted device (RMD)	6 TE

Central operating and visualisation unit for KNX installations via client software.

Knowledge of the relevant network technology is required for installation.

System requirements: Windows XP, VISTA and Windows 7 (32 or 64-bit).

- user interface can be configured individually for each room with special background images
- creation of max. 50 sequences from different actions
- for control and visualisation of e.g. shutters, lights, heating, ventilation, alarm system, sensors
- with status LEDs for LAN status, operational stand-by and connection status to web portal
- KNX server to supply up to 30 visualisation clients simultaneously with KNX data
- creation of light scenes
- creation of measured value archives and energy consumption visualisation with KNX energy meters
- configuration tool for installation of IP settings and parameterisations
- with configuration and client software on USB stick
- managing up to 30 users with different access rights
- software update via USB interface on the device
- integration of max. 10 network cameras
- RJ45 Port for LAN connection
- bus connection via connecting terminal
- with plug-in terminals

Processor	1 GHz
RAM	512 MB
Operating temperature	+ 5 ... + 45 °C
Dimensions (W x H x D)	189.7 x 125.7 x 48.3 mm
Assembling height	12 mm

PoE power supply according to IEEE 802.3af Class 3 possible without audio applications.

- for display of preconfigured functions, measured values and data
- suitable for vertical and horizontal domovea visualisation
- depending on the software visualisation one and two surface operation, stepless configuration based on sliding and page scrolling by swiping are supported
- multi-touch function for the connection of multiple actions, e.g. to activate a function with simultaneous setting of a function value
- display illumination can be switched on automatically using brightness sensor
- connection to KNX system possible via a local server e.g. the domovea server
- external applications (Apps) available in preinstalled Android launcher
- integration of door communication functions in the domovea client or Elcom VideoFON client
- silent, long-lasting convection cooling without fan
- RJ45 Port for LAN connection
- card slot with 8 GB SDHC card
- microphone and loudspeaker with echo suppression
- with USB/Mini USB type A adapter cable
- with RJ45 connector kit from connector and patch cable
- mini-USB 2.0 jack e.g. for external storage media or updates on the upper display edge is accessible without dismantling
- 2 USB 2.0 connections on the rear
- for flush mounting and hollow-wall mounting
- for vertical and horizontal mounting

Suitable for	Order no.	Page
Housing flush-mounted for WDI07x	WDW070	153
Housing flush-mounted for WDI07x, flush-to-wall	WDW071	154
optional

Touch panel 10'' Windows

Auxiliary voltage	24 V=
Power consumption	max. 20 W
TFT screen size	10"
Light intensity	300 cd/m ²
Transmission rate Ethernet	max. 1000 Mbit/s
Processor	2 x 1 GHz
RAM	2 GB
Operating temperature	+ 5 ... + 35 °C
Dimensions (W x H x D)	259.4 x 177 x 67.5 mm
Assembling height	10 mm

PoE power supply according to IEEE 802.3af Class 3 possible without audio applications.

- for display of preconfigured functions, measured values and data
- signal and operating panel with touch-sensitive TFT colour display in 16:9 format
- suitable for horizontal domovea visualisation
- depending on the software visualisation one and two surface operation, stepless configuration based on sliding and page scrolling by swiping are supported
- multi-touch function for the connection of multiple actions, e.g. to activate a function with simultaneous setting of a function value
- disabling function for cleaning the user interface
- display illumination can be switched on automatically using brightness sensor
- connection to KNX system possible via a local server e.g. the domovea server
- visualisation for Berker IP-Control via browser
- integrated PC with Windows embedded operating system
- integration of door communication functions in the Elcom VideoFON client
- silent, long-lasting convection cooling without fan
- 2 RJ45 Ports for LAN connection
- internal memory of 64 GB SSD present
- microphone and loudspeaker with echo suppression
- with USB/Mini USB type A adapter cable
- with RJ45 connector kit from connector and patch cable
- mini-USB 2.0 jack e.g. for external storage media or updates on the upper display edge is accessible without dismantling
- 2 USB 2.0 connections on the rear
- additional connection for Serial RS232
- RJ45 cable in scope of delivery
- for flush mounting and hollow-wall mounting
- for horizontal mounting

Suitable for	Order no.	Page
Housing flush-mounted for WDI10x	WDW100	153

¹⁾ Dimensions (W x H x D): 197.7 x 133.6 x 74 mm, cavity wall opening (W x H x D): 197.7 x 133.6 x 74 mm

²⁾ Dimensions (W x H x D): 269 x 186 x 74 mm, cavity wall opening (W x H x D): 269 x 186 x 74 mm

³⁾ Dimensions (W x H x D): 387 x 242 x 74 mm, cavity wall opening (W x H x D): 387 x 242 x 74 mm

Operating panels

IP Control RMD

Operating voltage	10 ... 30 V=
Power consumption	5 VA
receptable addresses	32766
RAM	256 MB
Operating temperature	+0 ... +35 °C
Assembling height as from DIN rail	58 mm
Width of rail mounted device (RMD)	8 TE
Dimensions (W x H x D)	144 x 90 x 64 mm

PRODUCT VARIANT FOR USE-INDEPENDENT ROOM CONTROL:

IP control (order no. 7571 00 36) including software, with which an assignment plan can be stored, for building services engineering control according to room/building use, e.g. in schools according to timetables or in public buildings according to visiting or working times.

Knowledge of the relevant network technology is required for installation.

Mobile devices such as iPhones/iPad, mobile phones or PDAs can be linked via the Internet.

- integrated element library with standard operating elements
- freely configurable graphic operating surface for representation on the PC monitor
- up to 20 operating configurations for different applications
- integration of external control units with JAVA support (e.g. tablet PC) via WLAN
- central operating and visualisation unit for KNX via web browser
- control of multimedia applications
- for control and visualisation of e.g. shutters, lights, heating, ventilation, alarm system, sensors
- with status LED for operational stand-by, data processing, KNX communication, LAN status
- KNX server to supply up to 15 visualisation clients with KNX data
- time updating via Internet NTP server and sending on the KNX
- creation of light scenes with up to 28 telegrams each
- central functions/scenarios for heating, shutters, illumination, etc. can be configured by end user
- remote commissioning / maintenance of KNX systems possible via the Internet
- commissioning and programming without ETS via web browser
- with week and year timer function
- configuration tool for installation of IP settings and parameterisations
- support of common web browsers (IE, Netscape, Firefox etc.)
- with event indicator for e.g. status/alarm messages via e-mail
- operation with non-choked output of KNX voltage supply possible (pay attention to current consumption)
- administration of 50 users for the control of access authorisation
- database connection to the memory of utilisation/ consumption data of the KNX
- also usable with Apple Macintosh
- with updatable Flash-Controller for subsequent function expansions
- integration of network cameras possible
- for LAN connection of individual KNX installations
- with integrated controller for logic functions (concatenations, threshold value processing)
- RJ45 Port for LAN connection
- bus connection via connecting terminal
- with screw terminals

Berker KNX wireless components

The Berker switch ranges S.1, B.3, B.7, Q.1, Q.3, K.1, K.5, R.1 and R.3 are available in conventional and in KNX wireless technology. As suitable for new buildings as for the refitting or extension of existing installations. It is equipped with amazing functions, such as precise dimming for all kind of bulbs.

Switch inserts

Relay insert

Operating voltage	230 V~	- low intrinsic energy requirement
Frequency	50/60 Hz	- also usable as push-button relay switch
Power consumption (standby)	< 0.3 W	- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
230 V incandescent lamps and halogen lamps	2300 W	- no conductive connection between supporting ring and spreading claws
230 V retrofit LED lamps	440 W	- with screw terminals
Dimmable energy-saving lamps	440 W	
Fluorescent lamps:		
- uncompensated	1100 VA	
- parallel compensated	1000 W /130 µF	
- in Duo circuit	1000 W	
- with electrical ballast (EB)	1000 W	
Compact fluorescent lamps with electronic ballast	22 x 20 W	
Dimmable conventional transformers	1500 VA	
Electronic transformers and dual-mode transformers	1500 W	
Minimum contact load	≈ 15 W	
Operating temperature	-5 ... +45 °C	
Number of substations	unlimited	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals	max. 2 x 1,5/1 x 2,5 mm ²	
Housing installation depth	22 mm	
Claw guidance installation depth	32 mm	

Neutral conductor necessary!

Comprehensive transmission and reception functions, in conjunction with a KNX wireless application module.

Design	Order no.	PU
Relay insert	8512 12 00	1

Switch insert 1gang

Operating voltage	230 V~
Frequency	50/60 Hz
Power consumption (standby)	< 0.3 W
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable 230 V retrofit LED lamps	5 ... 70 W
Dimmable energy-saving lamps	13 ... 80 W
Dimmable conventional transformers	25 ... 400 VA
Electronic transformers and dual-mode transformers	25 ... 400 W
Operating temperature	-5 ... +45 °C
Number of substations	unlimited
Cable length, extensions	max. 50 m
Load cable length	max. 100 m
Screw terminals	max. 2 x 1,5/1 x 2,5 mm ²
Insertion depth	32 mm

- low intrinsic energy requirement
- bulb-preserving soft startup
- automatic setting to dimmable loads (autoDetect process)
- short-circuit and overload proof (electronic fuse)
- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Caution!

Only connect **dimmable** 230 V ESL or retrofit-LED lamps.

Only suitable for operation with dimmable loads!

Do not connect inductive and capacitive loads jointly.
Comprehensive transmission and reception functions, in conjunction with a KNX wireless application module.

Design	Order no.	PU
Switch insert 1gang	8512 11 00	1

Switch insert 2gang

Operating voltage	230 V~
Frequency	50/60 Hz
Power consumption (standby)	< 1 W
230 V incandescent lamps and halogen lamps	per channel 35 ... 300 W
Dimmable 230 V retrofit LED lamps	per channel 12 ... 54 W
Dimmable energy-saving lamps	per channel 15 ... 54 W
Dimmable conventional transformers	per channel 35 ... 300 VA
Electronic transformers and dual-mode transformers	per channel 35 ... 300 W
Operating temperature	-5 ... +45 °C
Number of substations	unlimited
Cable length, extensions	max. per channel 50 m
Load cable length	max. 100 m
Screw terminals	max. 2 x 1,5/1 x 2,5 mm ²
Insertion depth	32 mm

- low intrinsic energy requirement
- bulb-preserving soft startup
- automatic setting to dimmable loads (autoDetect process)
- short-circuit and overload proof (electronic fuse)
- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- with 2 extension unit inputs for push-button (NO contact), single-surface operation
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Caution!

Only connect **dimmable** 230 V ESL or retrofit-LED lamps.

Only suitable for operation with dimmable loads!

Do not connect inductive and capacitive loads jointly.
Comprehensive transmission and reception functions, in conjunction with a KNX wireless application module.

Design	Order no.	PU
Switch insert 2gang	8512 22 00	1

Dimmer inserts

Touch dimmer (R, L)

Operating voltage	230 V~	- low intrinsic energy requirement
Frequency	50/60 Hz	- switch-on brightness level can be stored safe after power failure
Power consumption (standby)	< 0.3 W	- bulb-preserving soft startup
230 V incandescent lamps and halogen lamps	25 ... 400 W	- phase cut-on
Dimmable conventional transformers	25 ... 400 VA	- short-circuit and overload proof (electronic fuse)
Number of universal capacity enhancers	max. 2	- with extension unit input for push-button (NO contact) with single-surface operation and motion detector extension unit
Operating temperature	-5 ... +45 °C	- expandable with universal power boosters RMD Plus
Number of substations	unlimited	- no conductive connection between supporting ring and spreading claws
Cable length, extensions	max. 50 m	- with screw terminals
Load cable length	max. 100 m	
Screw terminals	max. 2 x 1,5/1 x 2,5 mm ²	
Insertion depth	32 mm	

ε

Comprehensive transmission and reception functions, in conjunction with a KNX wireless application module.

- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- with 2 extension unit inputs for push-button (NO contact), single-surface operation
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Do not connect inductive and capacitive loads jointly per series.

Comprehensive transmission and reception functions, in conjunction with a KNX wireless application module.

Design	Order no.	PU
Universal touch dimmer 2gang	8542 21 00	1

KNX wireless buttons for switches/dimmers

KNX wireless button 1gang quicklink

Wireless transmission/reception frequency	868.3 MHz
Wireless protocol	KNX Wireless
Transmitter duty cycle	1 %
Receiver category	2
Number of wireless channels	2
Number of quicklink links	max. 20 transmitter/receiver
Wireless transmission power	< 10 mW
Wireless transmission range (free field)	max. 100 m
Wireless transmission range (building)	max. 30 m
Operating temperature	-5 ... +45 °C

- low intrinsic energy requirement
- configurable transmission and/or reception behaviour
- reset function (to factory setting)
- quicklink functions: switching, dimming, blind, 2 scenes, time switching, NO contact push-button, memory
- integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
- ETS additional functions: +6 scenes, 1 button control up/down, operating mode on/off, dimming value, brightness display, push-button, status display, forced control
- LED application module/insert compatibility display
- with configuration and function LEDs
- with configuration and function button
- operating areas configurable as one or two-area operation
- switch-on brightness level for each operating area on configuration with dimmer insert, power failure proof, storable
- scene saving lockable
- with anti-dismantling protection
- top and bottom operating area on 1gang switching/dimming inserts and network insert are freely configurable
- toolless quicklink configuration using buttons and LED display

For manual actuation or remote control via KNX wireless.

KNX wireless button 4gang quicklink

Wireless transmission/reception frequency	868.3 MHz	– low intrinsic energy requirement
Wireless protocol	KNX Wireless	– functions for the push-button operation areas up/down or left/right can be freely configured as receiver for controlling the connected load and as transmitter for remote control of a blind, for example
Transmitter duty cycle	1 %	– configurable transmission and/or reception behaviour
Receiver category	2	– reset function (to factory setting)
Number of wireless channels	4	– quicklink functions: switching, dimming, blind, 2 scenes, time switching, NO contact push-button, memory
Number of quicklink links	max. 20 transmitter/receiver	– integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
Wireless transmission power	< 10 mW	– ETS additional functions: +6 scenes, 1 button control up/down, operating mode on/off, dimming value, brightness display, push-button, status display, forced control
Wireless transmission range (free field)	max. 100 m	– LED application module/insert compatibility display
Wireless transmission range (building)	max. 30 m	– with configuration and function LEDs
Operating temperature	-5 ... +45 °C	– with configuration and function button

Extended operating options on 1gang inserts through 2 additional, freely-configurable wireless channels.
For manual actuation or remote control via KNX wireless.

Suitable for	Order no.	Page

KNX wireless time switches

Relay insert

Operating voltage	230 V~	- low intrinsic energy requirement
Frequency	50/60 Hz	- also usable as push-button relay switch
Power consumption (standby)	< 0.3 W	- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
230 V incandescent lamps and halogen lamps	2300 W	- no conductive connection between supporting ring and spreading claws
230 V retrofit LED lamps	440 W	- with screw terminals
Dimmable energy-saving lamps	440 W	
Fluorescent lamps:		
- uncompensated	1100 VA	
- parallel compensated	1000 W /130 µF	
- in Duo circuit	1000 W	
- with electrical ballast (EB)	1000 W	
Compact fluorescent lamps with electronic ballast	22 x 20 W	
Dimmable conventional transformers	1500 VA	
Electronic transformers and dual-mode transformers	1500 W	
Minimum contact load	≈ 15 W	
Operating temperature	-5 ... +45 °C	
Number of substations	unlimited	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals	max. 2 x 1,5/1 x 2,5 mm ²	
Housing installation depth	22 mm	
Claw guidance installation depth	32 mm	

Neutral conductor necessary!

Comprehensive transmission and reception functions, in conjunction with a KNX wireless application module.

Design	Order no.	PU
Relay insert	8512 12 00	1

KNX wireless timer quicklink

- Display

Wireless transmission/reception frequency	868.3 MHz
Wireless protocol	KNX Wireless
Number of wireless channels	1
Number of quicklink links	max. 20 transmitter/receiver
Wireless transmission power	< 10 mW
Wireless transmission range (free field)	max. 100 m
Wireless transmission range (building)	max. 30 m
Astronomic time shift	± 2 h
Random number generator	± 15 min
Running accuracy	± 3 min/year
Power reserve	≈ 24 h
Number of switching times for on/off	20
Operating temperature	-5 ... +45 °C

Control using device buttons, wireless transmitters and programmed switching times.

- low intrinsic energy requirement
- 2 independent preset programme memories, individually adaptable
- with switchover manual/automatic mode
- astro programme for sunrise/sundown switching with city/country or co-ordinate input, individually adaptable
- holiday programme for random variation of the switching times in automatic operation
- standalone programme, wireless and extension unit commands are not executed
- configurable transmission and/or reception behaviour
- with keylock
- party function, no execution of automatic, wireless and extension unit commands (switch protection)
- reset function (to factory setting)
- quicklink functions: switching, 2 scenes, time switching, NO contact push-button, forced control
- integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
- ETS additional functions: +6 scenes, operating mode on/off, scene loading, time dimming value, push-button, status display
- with automatic summer-/winter time switching (can be switched off)
- indication of the application module/insert compatibility in the display
- LC display illuminated during operation
- LC display contrast is adjustable
- menu guidance available in German, English or French
- with anti-dismantling protection

Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals	max. 2 x 1,5/1 x 2,5 mm ²	
Housing installation depth	22 mm	
Claw guidance installation depth	32 mm	

Neutral conductor necessary!

Comprehensive transmission and reception functions, in conjunction with a KNX wireless application module.

Design	Order no.	PU
Relay insert	8512 12 00	1

Switch insert 1gang

Operating voltage	230 V~
Frequency	50/60 Hz
Power consumption (standby)	< 0.3 W
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable 230 V retrofit LED lamps	5 ... 70 W
Dimmable energy-saving lamps	13 ... 80 W
Dimmable conventional transformers	25 ... 400 VA
Electronic transformers and dual-mode transformers	25 ... 400 W
Operating temperature	-5 ... +45 °C
Number of substations	unlimited
Cable length, extensions	max. 50 m
Load cable length	max. 100 m
Screw terminals	max. 2 x 1,5/1 x 2,5 mm ²
Insertion depth	32 mm

- low intrinsic energy requirement
- bulb-preserving soft startup
- automatic setting to dimmable loads (autoDetect process)
- short-circuit and overload proof (electronic fuse)
- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Caution!

Only connect **dimmable** 230 V ESL or retrofit-LED lamps.

Only suitable for operation with dimmable loads!

Do not connect inductive and capacitive loads jointly.
Comprehensive transmission and reception functions, in conjunction with a KNX wireless application module.

Design	Order no.	PU
Switch insert 1gang	8512 11 00	1

Touch dimmer (R, L)

Operating voltage	230 V~
Frequency	50/60 Hz
Power consumption (standby)	< 0.3 W
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable conventional transformers	25 ... 400 VA
Number of universal capacity enhancers	max. 2
Operating temperature	-5 ... +45 °C
Number of substations	unlimited
Cable length, extensions	max. 50 m
Load cable length	max. 100 m
Screw terminals	max. 2 x 1,5/1 x 2,5 mm ²
Insertion depth	32 mm

- low intrinsic energy requirement
- switch-on brightness level can be stored safe after power failure
- bulb-preserving soft startup
- phase cut-on
- short-circuit and overload proof (electronic fuse)
- with extension unit input for push-button (NO contact) with single-surface operation and motion detector extension unit
- expandable with universal power boosters RMD Plus
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Comprehensive transmission and reception functions, in conjunction with a KNX wireless application module.

Design	Order no.	PU
Touch dimmer (R, L)	8542 11 00	1

Universal touch dimmer 1gang

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50/60 Hz	– bulb-preserving soft startup
Power consumption (standby)	< 0.3 W	– automatic setting to dimmable loads (autoDetect process)
230 V incandescent lamps and halogen lamps	25 ... 400 W	– phase cut-on or cut-off according to load type, self-learning
Dimmable 230 V retrofit LED lamps	5 ... 70 W	– short-circuit and overload proof (electronic fuse)
Dimmable energy-saving lamps	13 ... 80 W	– optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
Dimmable conventional transformers	25 ... 400 VA	– with extension unit input for push-button (NO contact) with single-surface operation and motion detector extension unit
Electronic transformers and dual-mode transformers	25 ... 400 W	– no conductive connection between supporting ring and spreading claws
Operating temperature	-5 ... +45 °C	– with screw terminals
Number of substations	unlimited	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals	max. 2 x 1,5/1 x 2,5 mm ²	
Insertion depth	32 mm	

Do not connect inductive and capacitive loads jointly.
Comprehensive transmission and reception functions, in conjunction with a KNX wireless application module.

Design	Order no.	PU
Universal touch dimmer 1gang	8542 12 00	1

KNX wireless motion detector application modules

KNX wireless motion detector comfort 1.1 m quicklink

Wireless transmission frequency	868.3 MHz	– low intrinsic energy requirement
Wireless protocol	KNX Wireless	– with memory function for presence simulation
Transmitter duty cycle	1 %	– teach function for response brightness via button
Receiver category	2	– with keylock
Number of wireless channels	1	– party function for switching on for 2 hours
Number of quicklink links	max. 20 transmitter/receiver	– reset function (to factory setting)
Wireless transmission power	< 10 mW	– switch-off pre-warning on dimmer inserts
Wireless transmission range (free field)	max. 100 m	– quicklink functions: switching, dimming, 2 scenes, time switching, NO contact push-button, Memory, forced control, Master-Slave
Wireless transmission range (building)	max. 30 m	– integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
Delay time, adjustable	≈ 1 s ... 3 h	– ETS additional functions: +6 scenes, operating mode on/off, push-button, status display, dimming value, brightness display, movement scene loading, no movement scene loading
Nominal mounting height	1.1 m	– LED application module/insert compatibility display
Detection angle, settable	each side ≈ 45 ... 90 °	– with operation and status LED, red/green/orange
Response sensitivity, settable	≈ 10 ... 100 %	– with configuration and function LEDs
Response brightness, adjustable	≈ 5 ... 1000 lx, ∞ lx (day)	– with configuration and function button
Range, frontal	≈ 12 m	– with button for on/off/automatic/memory/party function
Range, side	each ≈ 8 m	– remote control via quicklink transmitter
Detection field, rectangular shaped	≈ 12 x 16 m	– scene opening via KNX wireless appliances
Switch-off pre-warning to dimming value 50% for	30 s	– scene saving lockable
Operating temperature	-5 ... +45 °C	– µ-processor controlled mode of operation
Assembling height	34 mm	– with anti-dismantling protection
		– optional operation of extension units using installation push-button

Continuous direct sunlight penetrating the upward-pointing detection plane can result in failure of the motion detector.
Only suitable for indoor areas!

Blind control

μ

Blind insert comfort

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50/60 Hz	– with 2 mechanically and electrically mutually-locked relay contacts
Switching current (ohmic/ inductive)	max. 5 A	– with 230 V extension unit inputs for up and down
Switching current at cos φ = 0.6	max. 3 A	– for single, group and master controls
Power consumption (standby)	< 0.1 W	– no conductive connection between supporting ring and spreading claws
Change-over time for change of direction	< 0.6 s	– circuiting of extension units push-buttons for blinds, blind inserts, key push-buttons for blinds
Operating temperature	-5 ... +45 °C	– with screw terminals
Number of substations	unlimited	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals	max. 2 x 1,5/1 x 2,5 mm ²	
Housing installation depth	22 mm	
Claw guidance installation depth	32 mm	

Design	Order no.	PU
Blind insert comfort	8522 11 00	1

KNX wireless blind covers

KNX wireless blind button quicklink

Wireless transmission/ reception frequency	868.3 MHz	– low intrinsic energy requirement
Wireless protocol	KNX Wireless	– memory function for automatic execution of learned up and down times with position
Number of wireless channels	1	– configurable transmission and/or reception behaviour
Number of quicklink links	max. 20 transmitter/receiver	– party function, no execution of automatic, wireless and extension unit commands (lock-out protection)
Wireless transmission power	< 10 mW	– reset function (to factory setting)
Wireless transmission range (free field)		– quicklink functions: blind, 2 scenes, memory, forced control, up/down push-button
Wireless transmission range (building)	max. 30 m	– integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
Venetian blind movement time	2 min	– ETS additional functions: +6 scenes, operating mode, status display, 2 x alarm
Minimum slat adjustment time	≈ 150 ms	– LED application module/insert compatibility display
Lamella adjustment on signal duration	< 1 s	– with configuration and function LEDs
Lamella adjustment on button-press	< 0.4 s	– with indicator LED for lock-out protection
Change-over time for change of direction	< 0.6 s	– with status LED for memory and party function, red/ orange
Operating temperature	-5 ... +45 °C	– with configuration and function button
For manual actuation, automated memory execution or remote control via KNX wireless.		– scene opening via KNX wireless appliances
		– slat position storable for scene
		– with anti-dismantling protection
		– toolless quicklink configuration using buttons and LED display
		– sun protection and twilight-controlled lowering with wireless brightness sensor
		– with imprinted symbol arrows

Suitable for	Order no.	Page
Blind insert comfort	8522 11 00	175
Mains insert for KNX wireless application module	8502 01 00	190
optional		
KNX wireless brightness sensor	TR321B	174

KNX wireless blind time switch quicklink

- Display

Wireless transmission/reception frequency	868.3 MHz		
Wireless protocol	KNX Wireless		
Number of wireless channels	1		
Number of quicklink links	max. 20 transmitter/receiver		
Wireless transmission power	< 10 mW		
Wireless transmission range (free field)	max. 100 m		
Wireless transmission range (building)	max. 30 m		
Running time	2 min		
Astronomic time shift	± 2 h		
Random number generator for holiday program	± 15 min		
Running accuracy	± 3 min/year		
Power reserve	≈ 24 h		
Number of operation times for up/down	20/day		
Minimum slat adjustment time	≈ 150 ms		
Lamella adjustment on signal duration	< 1 s		
Lamella adjustment on button-press	< 0.5 s		
Change-over time for change of direction	< 0.6 s		
Operating temperature	-5 ... +45 °C		

Control using device buttons, wireless transmitters and programmed switching times.

- low intrinsic energy requirement
- 2 independent preset programme memories, individually adaptable
- with switchover manual/automatic mode
- astro programme for sunrise/sundown switching with city/country or co-ordinate input, individually adaptable
- holiday programme for random variation of the operation times in automatic operation
- standalone programme, wireless and extension unit commands are not executed
- configurable transmission and/or reception behaviour
- with keylock
- party function, no execution of automatic, wireless and extension unit commands (lock-out protection)
- reset function (to factory setting)
- quicklink functions for integration into the individual, group and master control of blinds/shutters
- quicklink functions: blind, 2 scenes, forced control, up/down push-button
- integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
- with automatic summer-/winter time switching (can be switched off)
- scene opening via KNX wireless appliances
- slat position storable for scene
- indication of the application module/insert compatibility in the display
- LC display illuminated during operation
- LC display contrast is adjustable
- menu guidance available in German, English or French
- with anti-dismantling protection
- sun protection and twilight-controlled lowering with wireless brightness sensor

Transmitters

Hand-held transmitter

KNX wireless hand-held 2-channel transmitter

- Labelling field

Operating voltage	6 V=
Battery service life [years]	≈ 5
Wireless transmission frequency	868.3 MHz
Wireless protocol	KNX Wireless
Transmitter duty cycle	1 %
Receiver category	2
Number of wireless channels	2
Wireless transmission power	< 10 mW
Wireless transmission range (free field)	max. 100 m
Wireless transmission range (building)	max. 30 m
Operating temperature	-10 ... +45 °C
Dimensions (L x W x H)	83 x 46.5 x 15.8 mm

- reset function (to factory setting)
- quicklink functions: switching, dimming, blind, 2 scenes, time switching, NO contact push-button, memory
- integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
- ETS additional functions: +6 scenes, operating mode on/off, push-button, status display, dimming value
- with configuration LED
- with transmission status and battery status LED, red/green/orange
- with configuration button
- with side locking buttons
- with 2 x lithium coin cell battery 3 V type: CR 2430
- with keyring

For wireless remote control of all assigned KNX wireless receivers.

Design	Order no.	PU
polar white/grey, glossy/matt	TU402	1

KNX wireless hand-held 4-channel transmitter

- Labelling field

Operating voltage	6 V=
Battery service life [years]	≈ 5
Wireless transmission frequency	868.3 MHz
Wireless protocol	KNX Wireless
Transmitter duty cycle	1 %
Receiver category	2
Number of wireless channels	4
Wireless transmission power	< 10 mW
Wireless transmission range (free field)	max. 100 m
Wireless transmission range (building)	max. 30 m
Operating temperature	-10 ... +45 °C
Dimensions (L x W x H)	83 x 46.5 x 15.8 mm

- reset function (to factory setting)
- quicklink functions: switching, dimming, blind, 2 scenes, time switching, NO contact push-button, memory
- integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
- ETS additional functions: +6 scenes, operating mode on/off, push-button, status display, dimming value
- with configuration LED
- with transmission status and battery status LED, red/green/orange
- with configuration button
- with side locking buttons
- with 2 x lithium coin cell battery 3 V type: CR 2430
- with keyring

For wireless remote control of all assigned KNX wireless receivers.

Design	Order no.	PU
polar white/grey, glossy/matt	TU404	1

KNX wireless hand-held 6-channel transmitter

- Labelling field

Operating voltage	6 V=
Battery service life	≈ 5 years
Wireless transmission frequency	868.3 MHz
Wireless protocol	KNX Wireless
Transmitter duty cycle	1 %
Receiver category	2
Number of wireless channels	6
Wireless transmission power	< 10 mW
Wireless transmission range (free field)	max. 100 m
Wireless transmission range (building)	max. 30 m
Operating temperature	+0 ... +45 °C
Dimensions (L x W x H)	133.6 x 50.2 x 16 mm

- reset function (to factory setting)
- quicklink functions: switching, dimming, blind, 2 scenes, time switching, NO contact push-button, memory
- integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
- ETS additional functions: +6 scenes, operating mode on/off, push-button, status display, dimming value
- with configuration LED
- with transmission status and battery status LED, red/green/orange
- with 2 x lithium coin cell battery 3 V type: CR 2430

For wireless remote control of all assigned KNX wireless receivers.

Design	Order no.	PU

KNX wireless hand-held 18-channel transmitter

- Labelling field

Operating voltage	6 V=
Battery service life	≈ 5 years
Wireless transmission frequency	868.3 MHz
Wireless protocol	KNX Wireless
Transmitter duty cycle	1 %
Receiver category	2
Number of wireless channels	18
Wireless transmission power	< 10 mW
Wireless transmission range (free field)	max. 100 m
Wireless transmission range (building)	max. 30 m
Operating temperature	+0 ... +45 °C
Dimensions (L x W x H)	133.6 x 50.2 x 16 mm

- reset function (to factory setting)
- quicklink functions: switching, dimming, blind, 2 scenes, time switching, NO contact push-button, memory
- integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
- ETS additional functions: +6 scenes, operating mode on/off, push-button, status display, dimming value
- with configuration LED
- with transmission status and battery status LED, red/green/orange
- with 2 x lithium coin cell battery 3 V type: CR 2430
- with channel group slide switch
- with movement and actuation-dependent labelling field illumination

For wireless remote control of all assigned KNX wireless receivers.

Design	Order no.	PU
white/dark blue	TU418	1

Wall-transmitters

KNX wireless wall-transmitter 1-gang flat quicklink

Operating voltage	3 V=	– reset function (to factory setting)
Battery service life	≈ 5 years	– quicklink functions: switching, dimming, blind, 2 scenes, time switching, NO contact push-button, memory
Wireless transmission frequency	868.3 MHz	– integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
Wireless protocol	KNX Wireless	– ETS additional functions: +6 scenes, operating mode on/off, push-button, status display, dimming value
Transmitter duty cycle	1 %	– with configuration LED
Receiver category	2	– with transmission status and battery status LED, red/green/orange
Number of wireless channels	2	– with configuration button
Number of quicklink links	max. 20 transmitter/receiver	– operating areas configurable as one or two-area operation
Wireless transmission power	< 10 mW	– with anti-dismantling protection
Wireless transmission range (free field)	max. 100 m	– with lithium coin cell battery 3 V type: CR 2430
Wireless transmission range (building)	max. 30 m	– top and bottom operating area are freely configurable
Operating temperature	-5 ... +45 °C	– toolless quicklink configuration using buttons and LED display
Assembling height	14 mm	– for flat surface mounting and extension of combinations

For wireless remote control of all assigned KNX wireless receivers.

Switch actuators

KNX wireless switch actuator 1-gang surface-mounted

Operating voltage	230 V~	- low intrinsic energy requirement
Frequency	50/60 Hz	- repeat function can be activated to increase the wireless range
230 V incandescent lamps and halogen lamps	1500 W	- reset function (to factory setting)
Fluorescent lamps:		- quicklink functions: switching, 2 scenes, time switching, NO contact push-button, forced control
- uncompensated	600 VA	- integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
- with electronical ballast (EB)	6 x 58 W	- ETS additional functions: +6 scenes, operating mode on/off, status display
Compact fluorescent lamps	6 x 18 W	- with control LED for On/Off
Conventional transformers	600 VA	- with manual operation on/off
Electronic transformers	600 W	- scene opening via KNX wireless appliances
Wireless reception frequency	868.3 MHz	- scene saving lockable
Wireless protocol	KNX Wireless	- toolless quicklink configuration using buttons and LED display
Transmitter duty cycle	1 %	- with screw-in lift terminals
Receiver category	2	
Number of quicklink links	max. 20 transmitter/receiver	
Operating temperature	-10 ... +55 °C	
Dimensions (L x W x H)	150 x 85 x 35 mm	

Design	Order no.	PU
white	TRE201	1

KNX wireless switch actuator 2-gang surface-mounted

Operating voltage	230 V~	- low intrinsic energy requirement
Frequency	50/60 Hz	- repeat function can be activated to increase the wireless range
Switching current	2x 10 A/230 V AC1 A	- reset function (to factory setting)
230 V incandescent lamps and halogen lamps	per channel 1500 W	- quicklink functions: switching, 2 scenes, time switching, NO contact push-button, forced control
Fluorescent lamps:		- integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
- uncompensated	per channel 600 VA	- ETS additional functions: +6 scenes, operating mode on/off, status display
- with electronical ballast (EB)	per channel 6 x 58 W	- with control LED for On/Off
Compact fluorescent lamps	18 W	- with manual operation on/off per channel
Conventional transformers	600 VA	- scene opening via KNX wireless appliances
Electronic transformers	per channel 600 W	- scene saving lockable
Wireless reception frequency	868.3 MHz	- toolless quicklink configuration using buttons and LED display
Wireless protocol	KNX Wireless	- with screw-in lift terminals
Transmitter duty cycle	1 %	
Receiver category	2	
Number of quicklink links	max. 20 transmitter/receiver	
Operating temperature	-10 ... +55 °C

230 V incandescent lamps and halogen lamps	2300 W	– integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
Fluorescent lamps:		– ETS additional functions: +6 scenes, operating mode on/off, 1 up/down button control, push-button, 2 x alarm, status display
- parallel compensated	250 W	– ETS additional function: repeater function
Conventional transformers	800 VA	– with configuration and function LEDs
Electronic transformers	1500 W	– with transmission status and control LED for On/Off
Wireless transmission/reception frequency	868.3 MHz	– with configuration and function button
Wireless protocol	KNX Wireless	– scene opening via KNX wireless appliances
Transmitter duty cycle	1 %	– scene saving lockable
Receiver category	2	– toolless quicklink configuration using buttons and LED display
Number of wireless channels	1	– with independent, mains supplied, binary input for potential-free contact
Number of quicklink links	max. 20 transmitter/receiver	– activation, for example through switch, push-buttons, timer
Wireless transmission power	< 10 mW	– confectioned, with 2-core cable
Wireless transmission range (free field)	max. 100 m	– for installation behind flush-mounted inserts
Wireless transmission range (building)	max. 30 m	– with screw-in lift terminals
Operating temperature	+0 ... +45 °C	
Binary cable length	≈ 20 cm	
Binary cable length, extendable to	max. 5 m	
Dimensions, sensor (Ø x H)	53 x 30 mm	
IP	20	

Design	Order no.	PU
white	TRB201	1

KNX wireless switch actuator 1gang/binary input 1gang flush-mounted

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50/60 Hz	– reset function (to factory setting)
Switching current		– quicklink functions: switching, 2 scenes, time switching, NO contact push-button, forced control
230 V incandescent lamps and halogen lamps	1500 W	– integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
Fluorescent lamps:		– ETS additional functions: +6 scenes, operating mode on/off, 1 up/down button control, push-button, 2 x alarm, status display
- parallel compensated	11x 36 W /47 µF	– ETS additional function: repeater function
Conventional transformers	800 VA	– with configuration and function LEDs
Electronic transformers	600 W	– with transmission status and control LED for On/Off
Wireless transmission/reception frequency	868.3 MHz	– with configuration and function button
Wireless protocol	KNX Wireless	– scene opening via KNX wireless appliances

01 Once the switch is connected to the emitter, start the configuration by pressing **cfg** button and then the button on the switch.

02 Select the function on the output (1 function = 1 color pattern). Validate by a long press > 2s until the LED blinks.

03 Exit configuration mode by a short press on **cfg** button on the emitter.

1 color pattern = 1 function

LED colour	On/Off Receivers	Dimmers	Shutters/Blinds

Micromodules

Wireless transmitter 2 inputs with battery

Supply voltage	3 V CR 2430
Transmission frequency	868.3 MHz
Dimensions	41 x 39.5 x 11 mm
Degree of protection	IP 30
Max. connection distance per input	< 10 m
Minimum contacts closing time	50 ms
Operating temperature	-10 °C to + 50 °C
Storage temperature	-20°C to +70°C

- 2 independent input channels.
- supply by battery.
- The specific functions of this product are defined in its configuration and set-up.

The flush-mounting input module TRM702A is a quicklink wireless transmitter. Powered by battery, it can be used to interface 2 floating contacts (switches, automatic-control contacts or intrusion alarm panel contacts) which can thus be rendered communicating. quicklink wireless products can be configured together and operated within the same wireless installation.

Design	Order no.	PU
light grey	TRM702A	1

Wireless transmitter/receiver 2 inputs + 1 output 200W

Supply voltage	230 V~ +10 %-15% 50/60 Hz 240 V~ +6%/-6% 50/60 Hz
Product consumption	100mW
Transmission frequency	868.3 MHz
Dimensions	40 x 40 x 18 mm
Degree of protection	IP 20
Max. connection distance per input	< 10 m
Minimum contacts closing time	50 ms
Operating temperature	-15 °C to + 45 °C
Storage temperature	-25°C to +70°C

- 2 inputs for connection of pushbuttons, switches or other automatic control contacts.
- one output to connect an electric load in ON/OFF mode.

TRM690G is a power supplied wireless transmitter/receiver 2-wire, supplied in series with the 230 V load. It is used to control incandescent, LV and ULV halogen, and dimmable LED lights.

Design	Order no.	PU
light grey	TRM690G	1

Wireless transmitter/receiver 2 inputs + 1 dimmer 200W

Supply voltage	230 V~ +10 %-15% 50/60 Hz 240 V~ +6%/-6% 50/60 Hz
Product consumption	100mW
Transmission frequency	868.3 MHz
Dimensions	40 x 40 x 18 mm
Degree of protection	IP 20
Max. connection distance per input	< 10 m
Minimum contacts closing time	50 ms
Operating temperature	-15 °C to + 45 °C
Storage temperature	-20°C to +70°C

- 2 inputs for connection of pushbuttons, switches or other automatic control contacts.
- a dimming output (max. 200W).

The TRM691E is a wireless transmitter/receiver, powered in series with the load. It is used for dimming incandescent, LV and ULV halogen, and dimmable LED loads.

Design	Order no.	PU
light grey	TRM691E	1

Wireless transmitter/receiver 2 inputs + 1 output 3A

Supply voltage	230 V~ +10 %-15% 50/60 Hz 240 V~ +6%/-6% 50/60 Hz
Product consumption	150mW
Typical dissipation under load	450mW
Maximum switching rate at full load	15 switching cycles/minute
Transmission frequency	868.3 MHz
Dimensions	40 x 40 x 20 mm
Electrical characteristics of the inputs	12 V 1 mA
Surge voltage	4KV
Degree of protection	IP 20
Max. connection distance per input	< 10 m
Minimum contacts closing time	50 ms
Operating temperature	-10 °C to + 50 °C
Storage temperature	-25°C to +70°C

- 2 inputs for connection of pushbuttons, switches or other automatic control contacts.
- an output with relay, capable of ON-OFF switching of an electrical load

The TRM693G is a wireless transmitter/receiver, powered by the mains. It is particularly suitable for ON/OFF control of lighting circuits at 230 V.

Design	Order no.	PU
light grey	TRM693G	1

Wireless transmitter/receiver 2 inputs + 1 shutters/blinds output 3A

Supply voltage	230 V~ +10 %-15% 50/60 Hz 240 V~ +6%/-6% 50/60 Hz
Product consumption	150mW
Typical dissipation under load	450mW
Time delay between 2 movements in opposite directions	600ms
Maximum switching rate at full load	15 switching cycles/minute
Transmission frequency	868.3 MHz
Dimensions	40 x 40 x 20 mm
Electrical characteristics of the inputs	12 V 1 mA
Surge voltage	4KV
Degree of protection	IP 20
Max. connection distance per input	< 10 m
Minimum contacts closing time	50 ms
Operating temperature	-10 °C to + 50 °C
Storage temperature	-25°C to +70°C

- 2 inputs for connection of switches or pushbuttons.
- an output to control a motor for shutters, awnings or Venetian blinds.

The TRM692G is a wireless transmitter/receiver, powered by the mains.

Design	Order no.	PU
light grey	TRM692G	1

Wireless transmitter/receiver
2 inputs + 1 output 4A

Supply voltage	230 V~ +10 % -15% 50/60 Hz 240 V~ +6%/-6% 50/60 Hz
Product consumption	150mW
Typical dissipation under load	150mW
Maximum switching rate at full load	20 switching cycles/minute
Transmission frequency	868.3 MHz
Dimensions	40 x 40 x 20 mm
Electrical characteristics of the inputs	12 V 1 mA
Surge voltage	4KV
Degree of protection	IP 20
Max. connection distance per input	< 10 m
Operating temperature	-10 °C to + 50 °C
Storage temperature	-25°C to +70°C

- 2 inputs for connection of pushbuttons, switches or other automatic control contacts, a floating contact output for ON-OFF control of electrical loads.

The TRM694G is a wireless transmitter/receiver, powered by the mains.

Design	Order no.	PU
light grey	TRM694G	1

Control for latching relay and timer

Supply voltage	230 V AC
Max. current consumption	500mW
Total power loss under In	150mW
Transmission frequency	868.3 MHz
Dimensions	40 x 40 x 18 mm
Rated current	0.5A
Degree of protection	IP 20
Operating temperature	-15 °C to + 45 °C
Storage temperature	-25°C to +70°C

The function of RTM600 is to add a wireless control on an existing toggle or timer circuit. The product is located in the wall box behind a conventional push button which controls the existing 230V toggle or timer circuits. It acts as a wireless, receiver and delivers a 200ms pulse contact after receiving a wireless control.

Design	Order no.	PU
light grey	TRM600	1

Wireless blind actuator

KNX wireless blind actuator 1gang surface-mounted

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50/60 Hz	– repeat function can be activated to increase the wireless range
Switching current	10 A / 230 V AC1	– reset function (to factory setting)
Wireless reception frequency	868.3 MHz	– quicklink functions: blind, 2 scenes, forced control, up/down push-button
Wireless protocol	KNX Wireless	– integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
Transmitter duty cycle	1 %	– ETS additional functions: +6 scenes, operating mode, status display, 2 x alarm
Receiver category	2	– with configuration and function LEDs
Number of quicklink links	max. 20 transmitter/receiver	– with control LED (relay closed)
Wireless transmission range (free field)	max. 100 m	– with configuration and function button
Wireless transmission range (building)	max. 30 m	– with manual operation up/down
Lamella adjustment on signal duration	< 1 s	– scene opening via KNX wireless appliances
Change-over time for change of direction	< 0.6 s	– scene saving lockable
Operating temperature	-10 ... +55 °C	– toolless quicklink configuration using buttons and LED display
Dimensions (L x W x H)	150 x 85 x 35 mm	– with 2 mechanically and electrically mutually-locked relay contacts
IP	55	– with screw-in lift terminals

Design	Order no.	PU
white	TRE221	1

Power supply for KNX wireless application modules

Power supply for KNX wireless application module

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50/60 Hz	– as supply for wireless application modules
Power consumption (standby)	< 0.1 W	– no conductive connection between supporting ring and spreading claws
Operating temperature	-5 ... +45 °C	– with screw terminals
Screw terminals	max. 1 x 4/2 x 2,5 mm ²	
Insertion depth	22 mm	
Housing installation depth	32 mm (claw guide)	

Comprehensive transmission and reception functions, in conjunction with a KNX wireless application module.

Suitable for	Order no.	Page
KNX wireless buttons for switches/dimmers		163
KNX wireless motion detector application modules		170
KNX wireless blind covers		175
KNX wireless timer quicklink	8574 52 ..	167

Design	Order no.	PU
Mains insert for KNX wireless application module	8502 01 00	1

Unidirectional wireless input concentrator

Unidirectional wireless input concentrator

Supply voltage	30V DC
Transmission frequency	868.3 MHz
Dimensions	203 x 77 x 26,5 mm
Degree of protection	IP 30
Operating temperature	0 °C to + 45 °C
Storage temperature	-20°C to +70°C

- 24 channels available in the TX100 configuration.
- 32 channels available in the ETS configuration.
- maximum concentration of 24 wireless inputs per channel.
- view of status by 2x8 segment display.
- possibility to restore the factory settings for the product.
- possibility of deleting links created from the product.

The TR351 concentrators increase the number of unidirectional wireless products in a combined system (wireless/wire-based) by grouping together the inputs that perform the same function.

The precise functions of these products depend on the configuration and settings.

Design	Order no.	PU
white	TR351A	1

Media coupler

Supply voltage	30V DC (TBTS, SELV, ZLVS)
Transmission frequency	868.3 MHz
Dimensions	203 x 77 x 26,5 mm
Degree of protection	IP 30
Operating temperature	0 °C to + 45 °C
Storage temperature	-20°C to +70°C

- wire products and wireless products interface via bus KNX.
- Bus and wireless telegram visualization by LEDs and 2x8 segment display.

Couplers TR131 provide interface of tebis range wire products and wireless products. They are part of tebis installation system.

Design	Order no.	PU
white	TR131B	1

seprio alarm system

The seprio wireless intrusion alarm is designed for retrofitting of residential buildings and small business premises. More than just a basic alarm, seprio range offers you a user-friendly and interactive system, operating through smartphone interface, providing constant contact with the building and on-demand monitoring of what is happening at home.

Command keypad

Power supply	4.5V / 2.7Ah battery pack
Battery life	3 years in normal conditions of use
Average current consumed	90µA
Operating temperature	-10°C to 55°C
Degree of mechanical protection	IP30
Dimensions	194 x 95 x 19mm
Weight	270g (with power pack)

Each command is confirmed with an audible signal and a visual signal (LED) issued by the keypad. The keypad also indicates the system status and any faults or open doors or windows.

- 4 personalisable keys
- code-based access to keypad commands
- alarm command functions
- 3-colour LED to support use and programming

The command and information keypad can be used to operate an intrusion protection system from inside the home.

Design	Order no.	PU
white	RLF620X	1

Screen vocal keypad with tag

Power supply	4.5V / 2.7Ah battery pack
Battery life	5 years in normal conditions of use
Average current consumed	45µA
Operating temperature	-10°C to 55°C
Degree of mechanical protection	IP30
Dimensions	194 x 95 x 19mm
Weight	220g (with power pack)

- access codes
- tag reader (identification of up to 32 tags)
- 4 keys (2 pre-programmed, and 2 menu keys whose functions depend on what is displayed on the screen)
- touch screen zone for display navigation
- speech synthesis and OLED screen

The vocal keypad with tag reader and screen can be used to operate an intrusion protection system from inside the home.

Curtain detector

Power supply	lithium battery pack 3V / 2.4Ah	- for indoor application
Detection angle	8°	
Detection range	12m	
Operating temperature	-10°C to +55°C	
Degree of mechanical protection	IP31	
Dimensions	58 x 102 x 57mm	
Weight	115g	

Design	Order no.	PU
white	S163-22X	1

Expert pet tolerant motion detector

Power supply	lithium battery pack 3V / 2.4Ah	- for indoor application
Detection angle	85°	
Detection range	12m	
Operating temperature	-10°C to +40°C	
Degree of mechanical protection	IP31	
Dimensions	58 x 102 x 57mm	
Weight	115g	

Design	Order no.	PU
white	S165-22X	1

Pet-tolerant IR detector-camera with sending pictures

Power supply	lithium battery 4.5V / 3Ah
Detection angle	90°
Detection range	12m
Operating temperature	0°C to +55°C
Degree of mechanical protection	IP31
Dimensions	125 x 85 x 67mm
Weight	205g

Fitted with a specific lens and able to record image sequences using its built-in camera, the PIR motion detector with image transmission detects intrusion in rooms at risk in the home and is able to distinguish between the presence of a human being and that of a pet (cat, dog).
Following infrared detection, the motion detector triggers the alerts and deterrents and records a sequence of images. These can then be:

- Stored on the microSD card (supplied)
- Remotely transmitted via a dialler/transmission module GSM/GPRS(MMS)

Design	Order no.	PU
white	RLA176X	1

Outdoor anti-masking detector

Power supply	lithium battery 3.6V / 4Ah
Detection angle	180°
Detection range	5 setting levels from 2.5 to 12m
Operating temperature	-20°C to +60°C
Degree of mechanical protection	IP55
Dimensions	71 x 186 x 106mm
Weight	540g

- detects intrusion before break-in
- anti-masking protection: detects any fraudulent masking of the front face 24/24
- 6 ready-to-use area mask sets supplied to adapt detection area

Design	Order no.	PU
white	RLA144X	1

Outdoor motion detector 2 x 12m

Power supply	lithium battery 3.6V / 4Ah
Detection range	12m
Operating temperature	-20°C to +50°C
Degree of mechanical protection	IP55
Dimensions	56 x 128 x 235mm
Weight	596g

- for indoor / outdoor use

Design	Order no.	PU
white	S145-22X	1

Wireless dual technology motion detector

Power supply	lithium battery 2 x (3.6V / 2Ah)
Detection angle	90°
Detection range	12m
Operating temperature	-10°C to +55°C
Degree of mechanical protection	IP31
Dimensions	125 x 75 x 65mm
Weight	208g

- dual technology: infrared and hyperfrequency

Design	Order no.	PU
white	S121-22X	1

Wireless door and window detector

Power supply	lithium battery 3V / 1Ah	- for indoor use
Operating temperature	-10°C to +55°C	
Degree of mechanical protection	IP31	
Dimensions	108 x 26 x 30mm	
Weight	60g	

The contact detector is used to protect openings such as doors & windows. It is fitted with a built-in magnetic contact (reed switch).

Design	Order no.	PU

white	S157-22X	1

Receivers

External receiver

Operating temperature	-20°C to +70°C	- for indoor or outdoor application
Degree of mechanical protection	IP55	
Dimensions	150 x 85 x 35mm	
Weight	224g	

Possible applications: on/off, time lag, presence simulation (when associated to keypad), remote control, impulse mode, system status reporting, activation in case of intrusion.

Design	Order no.	PU
230V	S781-22X	1
12 - 24V	S791-22X	1

Alarm interface

Power supply	30V DC via KNX bus	- for indoor application
Operating temperature	0°C to +45°C	
Degree of mechanical protection	IP30	
Dimensions	203 x 77 x 26.5mm	
Weight	140g	

The TRC120 interface is used to enable Hager intrusion alarm system to communicate with the KNX world. On the alarm side, the interface communicates with the alarm central unit by wireless and by TP bus on the KNX side.

Design	Order no.	PU
white	TRC120	1

Wireless command receiver

Power supply	battery MPU01X	- for indoor or outdoor (in sheltered location) application
Operating temperature	-25°C to +70°C	
Degree of mechanical protection	IP54	
Dimensions	245 x 215 x 120mm	
Weight	880g	

The receiver makes it possible to:

- interface a hardwired alarm product or any other low voltage automatic pulsed control device with the alarm system,
- operate additional deterrence devices (smoke generator, lighting, etc.) and other electrical devices (low voltage or power)

Design	Order no.	PU
white	RLE700X	1

Transmitters

PSTN + GSM/GPRS stand-alone transmitter

Power supply	battery
Battery life	5 years in normal conditions of use
Average current consumed	235µA
Operating temperature	-10°C to +55°C
Degree of mechanical protection	IP30
Dimensions	216 x 237 x 67mm
Weight	1070g

Power supply:
 - (4.5 V, 14 Ah) RXU05X power pack - low voltage threshold standard Type C - low threshold 3.65 V
 - or (4.5 V, 14 Ah) RXU05X power pack backed up by (3.7 V 1.3 Ah) RXU03X Li-Ion buffer battery
 - or (200-240 VAC 50-60 Hz / 4.5 V DC 2.2 A) RXU01X internal mains power module backed up by (3.7 V/1.3 V) RXU03X Li-Ion buffer battery - Low voltage threshold Type A - 3.6V - recharge time 20 hours to 80% - Duration with back-up: 36 h.

The RLD464F dialler operates with the Hager Twinband® alarm system.

It is suitable for specific configurations when a plug-in module cannot be directly added to the control panel.

The RLD464F/T dialler is recommended for complete extended and redundant transmission in voice mode (analogical) via PSTN with GSM back-up.

Design	Order no.	PU
white	RLD464F	1

PSTN + GSM / GPRS plug-in module

Power supply	battery
Battery life	5 years in normal conditions of use
Average current consumed	235µA
Operating temperature	-10°C to +55°C
Degree of mechanical protection	IP30
Dimensions	165 x 63 x 35mm
Weight	114g

Power supply:
 - (4.5 V, 14 Ah) RXU05X power pack - low voltage threshold standard Type C - low threshold 3.65 V
 - or (4.5 V, 14 Ah) RXU05X power pack backed up by (3.7 V 1.3 Ah) RXU03X Li-Ion buffer battery
 - or (200-240 VAC 50-60 Hz / 4.5 VDC 2.2 A) RXU01X internal mains power module backed up by (3.7 V / 1.3 V) RXU03X Li-Ion buffer battery - Low voltage threshold Type A - 3.6 V - recharge time 20 hours to 80% - Duration with back-up: 36 h.

The RLD454F plug-in module operates with the Hager Twinband® alarm system.

It can be fitted to the control panel as an optional device.

The RLD454F module is recommended for complete extended and redundant transmission in voice mode (analogical) via PSTN with GSM back-up.

Design	Order no.	PU
white	RLD454F	1

Sirens

Indoor siren with vocal notification

Power supply	lithium battery 2 x (3.6V / 13Ah)
Battery life	5 years in normal conditions of use
Acoustic level	93 (± 2) dB
Operating temperature	-10°C to +55°C
Degree of mechanical protection	IP31
Dimensions	178 x 191 x 61mm
Weight	900g

The indoor siren provides audible information and ensures intruder deterrence when an alarm is triggered. It sounds loudly in the event of intrusion, fire, audible warnings or household faults and issues vocal notifications about the system status. It can be used as a door chime.

Design	Order no.	PU
white	RLD414X	1

Outdoor siren with orange flash

Power supply	battery 6V / 14 Ah RXU06X	- for outdoor application
Battery life	5 years in normal conditions of use	
Acoustic level	103 (± 2) dB	
Operating temperature	-25°C to +70°C	
Degree of mechanical protection	IP54	
Dimensions	235 x 256 x 90mm	
Weight	2500g	

In addition to the protection provided by the control panel with built-in siren and keypad, the outdoor siren deters intruders. In the event of intrusion, the siren is immediately triggered and sounds loudly for 90 seconds. If a fire is detected, the siren is triggered in fire sounding mode for 5 min. If somebody attempts to pull the siren off the wall, it sounds and then triggers all the alerts and deterrents via the control panel. Thanks to its built-in transmitter, the siren notifies the control panel of battery faults, the radio link status and the tamper pin status.

Design	Order no.	PU
white	RLD405F	1

Outdoor vocal siren with orange flash

Power supply	battery 6V / 14 Ah RXU06X
Battery life	5 years in normal conditions of use
Acoustic level	103 (± 2) dB
Operating temperature	-25°C to +70°C
Degree of mechanical protection	IP54
Dimensions	235 x 256 x 90mm
Weight	2500g

- for outdoor application
- speech synthesis in 6 languages

In addition to the protection provided by the control panel with built-in siren and keypad, the outdoor siren deters intruders.

In the event of intrusion, the siren is immediately triggered and sounds loudly for 90 seconds.

If a fire is detected, the siren is triggered in loud sounding mode for 15 s alternated with "fire alarm" message.

If somebody attempts to pull the siren off the wall, it sounds and then triggers all the alerts and deterrents via the control panel.

Thanks to its built-in transmitter, the siren notifies the control panel of battery faults, the radio link status and the tamper pin status.

The speech synthesis system helps with alarm system use.

white	TV260	1

Mains power supply module

- mains power supply: 200-240V AC - 50/60Hz / 4.5V DC 2.2A
- for RLC304F and RLD464F
- compatible with RXU03X

Design	Order no.	PU
power supply module	RXU01X	1

1 wired input / 2 relay outputs module

- for control panel RLC304F
- Allows to connect the following components to the control panel:
- auto-powered wired siren
- alarm system (flash, voice module,...)
- recording system (recording controller, video recorder)

Design	Order no.	PU
white	RLH002X	1

Connecting socket with relay (230V)

- for smoke detector S155-22X
- for heat detector S157-22X
- 1NO/1NC contact 230V (AC or DC)

Design	Order no.	PU
white	RXA05X	1

Batteries

Battery packs
